

BB104X Degree Project in Biotechnology and Manage- ment, First Cycle 15.0 credits

Examensarbete inom bioteknik och management, grundnivå

This is a translation of the Swedish, legally binding, course syllabus.

If the course is discontinued, students may request to be examined during the following two academic years

Establishment

Course syllabus for BB104X valid from Autumn 2015

Grading scale

P, F

Education cycle

First cycle

Main field of study

Technology

Specific prerequisites

At least 120 credits completed in CINEK program, of which at least 20 credits completed courses in the area of biotechnology up to the retake period in January

Language of instruction

The language of instruction is specified in the course offering information in the course catalogue.

Intended learning outcomes

1. Demonstrate knowledge of the chosen topic's scientific foundation and applicable methods, insight into current research and development, as well as in-depth knowledge in some part of the subject area
2. Critically search, collect and use relevant information, and identify the need for further knowledge
3. Formulate, assess and handle problems and critically discuss phenomena, issues and situations
4. Plan and with applicable methods carry out tasks within given time frames
5. Demonstrate the ability to plan and with adequate methods carry out specific assignments within given time frames
6. Demonstrate the ability to evaluate products, processes, systems, methods or technical solutions
7. Show the skills required to work independently, within some part of the field of technology
8. Present and discuss information, problems and solutions orally or in writing
9. Demonstrate the ability to account for work, conclusions, and the underlying arguments with requirements of structure, citation, and referencing.
10. Demonstrate the ability to make assessments considering relevant scientific, engineering and social aspects
11. Demonstrate the ability to make assessments and reflect around, evaluate and review own and others' results
12. Continuously plan and document a work procedure
13. Show knowledge of planning, structuring, implementing of a project, its impact and reflect on the work process.
14. Identify the ideas of commercialisation and the possibilities of funding to start a technology-based company.

Course contents

Individually designed and completed project within Biotechnology. Assessment of other projects.

Course literature

Given during the course and includes articles, books and other resources relevant to the project. This list is established during the course.

Examination

Based on recommendation from KTH's coordinator for disabilities, the examiner will decide how to adapt an examination for students with documented disability.

The examiner may apply another examination format when re-examining individual students.

Other requirements for final grade

Passed written report and oral presentation (PRO1; 15 credits), 80% attendance at scheduled lectures, seminars and exercises.

Ethical approach

- All members of a group are responsible for the group's work.
- In any assessment, every student shall honestly disclose any help received and sources used.
- In an oral assessment, every student shall be able to present and answer questions about the entire assignment and solution.
