

EH2760 Management of Projects 6.0 credits

Projektstyrning

This is a translation of the Swedish, legally binding, course syllabus.

If the course is discontinued, students may request to be examined during the following two academic years

Establishment

The official course syllabus is valid from the spring semester 2022, in accordance with decision by the Dean of school: J-2022-0928. Decision date: 2022-06-06.

Decision to discontinue this course

The course is discontinued at the expiration of spring term 2024 in accordance with Head of School decision: J-2022-0928. Decision date: 2022-06-06. The course was given the last time in the autumn semester 2019. Final opportunity for examination in the course will be given spring term 2024. Students can during the phasing-out period be examined twice per academic year. Students are offered to follow teaching and examination in equivalent part of the course IL2232 during phasing-out period.

Grading scale

A, B, C, D, E, FX, F

Education cycle

Second cycle

Main field of study

Electrical Engineering

Specific prerequisites

For non-program students: 120 credits and English B or the equivalent

Language of instruction

The language of instruction is specified in the course offering information in the course catalogue.

Intended learning outcomes

After the course, the participant should understand what a project manager does and how one works in an industrial project and be able to:

- describe and apply the different phases in a project i.e. planning, follow-up and completion of a project
- use methods and tools to plan and follow up projects taking into consideration time, cost and resources.
- give examples of how activities as planning, project meetings, documentation should be carried out
- based on a model for projects, create necessary documentation for a project
- plan and carry out a risk analysis
- analyse an industrial project
- report result through oral and written communication

Course contents

The course focuses more on understanding and awareness of the problems associated with project management than on giving practical skills in a certain method for projects. Examples of different project models are, however, given by invited guest lecturers.

In the course, the following item is gone through: the project as work method, development, delivery and purchasing projects, the interaction between customer and supplier, overview and examples of project models, the different phases of a project, tender procedure, leadership, group dynamics, risk analysis, the project document (for example the opening for estimates, tender, contract, documentation of the project, project plan, final report and evaluation).

Examination

- PRO1 - Project Assignment, 0.7 credits, grading scale: P, F
- PRO2 - Project Assignment, 1.5 credits, grading scale: P, F
- PRO3 - Project Assignment, 1.5 credits, grading scale: P, F

- PRO4 - Project Assignment, 1.5 credits, grading scale: P, F
- SEM1 - Seminar, 0.8 credits, grading scale: P, F

Based on recommendation from KTH's coordinator for disabilities, the examiner will decide how to adapt an examination for students with documented disability.

The examiner may apply another examination format when re-examining individual students.

Other requirements for final grade

80 % Attendance on lectures (SEM1; 0.8 hp).

Four written assignments (PRO1: 0.7p + PRO2: 1.5p + PRO3: 1.5 p + PRO4: 1.5 p).

Ethical approach

- All members of a group are responsible for the group's work.
- In any assessment, every student shall honestly disclose any help received and sources used.
- In an oral assessment, every student shall be able to present and answer questions about the entire assignment and solution.
