

KTH-SJTU Summer School 2019

Interdisciplinary Biomedical Research

Join us June 10 -14 for the 2019 edition of the KTH-SJTU Summer School, hosted in Stockholm, Sweden. We have a packed program with lectures, seminars and labs with the most prominent professors in the interdisciplinary field of biomedical engineering from each university. You will learn about the latest research and how to collaborate in an intercultural context.

About the Summer School

- » The course will include lectures on in biomedical engineering, proteomics, genomics, robotics, neurology, biomedical simulations and modeling.
- » The course will take place June 10-14.
- » 20 spots are available for PhD students from each university.
- » A few of the spots may be given to master students with a high interest in academic research.
- » Upon completion of the course each student will receive a certificate of participation.
- » KTH students will be enrolled for 3 ECTS.

How to apply as a KTH student

Discuss with your supervisor first if this is a suitable course for your degree.
