

Shopping

2nd-hand Shopping

Renting

Sharing

Our project connects KTH students using Smart Boxes. We place them in all KTH buildings so students can buy and sell their new and second-hand assets. They can also rent and borrow their belongings for free or for a fixed price. Last but not least, students can share what they do not need with their mates. The operation is easy, just scan the QR Code on the box with your phone and unlock the door. Pick the asset up and try it. Buy it with your phone or put it back in the box and close the door and lock it. Our platform is C2C so students are both producers and consumers.
