

What is the idea?

To co-create and implement a KTH campus nighttime plan

which involves having an open discussion with students to create and implement a vision for nighttime campus that provides opportunities for co-experience in a safe, inclusive and accessible manner.

SCAN to watch the problem explained in 45 sec

From this week on Stockholm will have more than 15 hours of darkness per day, resulting into nighttime environments influencing our well-being and social life.

What problems am I solving?

- Contributing to better campus life through improving urban planning and management in participatory and inclusive ways
- Extending the time-span use of the campus through increasing the perception of safety in the area
- Developing a stronger nighttime economy & adding to the social diversity on campus
