

Call for Students: Thesis and Research Opportunities on Management/Strategy Thesis

Title: *Embedding CSRD and ESRS into University Governance: A Strategic Framework for Sustainability Reporting at KTH*

Description:

This thesis will focus on the organisational and governance perspective of implementing CSRD/ESRS at a technical university. The work would explore how sustainability reporting can be integrated into teaching, research, and operations, and how different stakeholder groups (management, staff, students) perceive and engage with sustainability reporting. The study would benchmark KTH against other Swedish and international universities to identify best practices, resulting in a strategic framework and policy recommendations for improving KTH's sustainability governance and reporting.
