

Monday 9 February, 12:15–13:00 ([V3](#) , KTH Campus and [Zoom](#))

The MIST team will hold a lunch seminar on how KTH students are developing a **real satellite mission**. Formulated in 2014 and worked on since, the project is now moving into its final phase ahead of a planned launch in **2027** as part of KTH's 200-year anniversary. Come along to learn more and find out how you can get involved as a student before it launches. No registration is required!
