

Space Seminar | How to Become an Analogue Astronaut and Get Space Exploration Experience

Meet Madeleine Monperrus, a student in the Vehicle Engineering program at KTH and join this lunch lecture to know more about Asclepios, an international student led organisation simulating a lunar mission every summer. As a selected analogue astronaut for Asclepios VI, Madeleine Monperrus will talk about her own experience in the organisation, but most importantly what it takes for you to participate in the only student-led mission in the world.

If you want to get one step closer to real human space exploration, book the time in your calendars and we'll see you there!
