

Vad händer inom **optiken** i Stockholm?

Torsdagen den 30 maj 17.30 – 18.30

**KTH-Kista, Isafjordsgatan 22, Electrum
Plan 3, Sektion C, FMI seminarierum**

“Optical fibers: fabricating, using, having fun”

Prof. Walter Margulis, Acreo Swedish ICT AB

Abstract: Optical fibers have many applications besides telecommunications. In this presentation, I will describe how fibers are manufactured and how they can be used in various applications. I will try to show that research in optical fibers has many interesting developments, and recent breakthroughs. On a personal note, I will try to illustrate why the speaker – supposedly an expert on fibers – is puzzled with the result of the simplest of experiments with optical fibers. Perhaps you can explain what is going on.

Demonstration: The talk will also include some demonstrations.

OPTOPUB 18.30 –20.00

för alla som vill prata optik och fotonik eller annat

***ADOPT, Linné center i Modern Optik och Fotonik,
bjuder alla som föranmält sig på mat och dryck.***

***Viktigt: Föranmälan till anand@kth.se för mat!!!
Senast Onsdag 29:e maj före kl.14:00 !!!***

Välkomna!
