

## Inspired-by-Space Pavilion Student competition for a small building inside the Dome of Visions

**Welcome to the Final Crit and Exhibition of 21 design proposals  
KTH Main Library, 31 March – 1 April 2015**

**Tuesday 31 March**

9.00-16.00 Final Crit (academic review)  
17.00-18.30 Vernissage - Refreshments served!

**Wednesday 1 April**

12.00 Awards Ceremony with the Jury

In February 2015, all students in Master Studio 4, KTH School of Architecture, were invited to participate in an architectural competition organised as part of their course plan. On 31 March, 21 proposals will be submitted to a Competition Jury consisting of:

Kent Martinussen (Chair), Architect, CEO, Danish Architecture Centre.

Christina Lindbäck, S V P Corporate Sustainability, NCC AB

Kristoffer Tejlgaard, Architect, Tejlgaard & Jepsen

Ulla Bergström, Architect, White Architects, Stockholm

Christer Fuglesang, Astronaut, KTH Space Center

Karolina Keyzer, City Architect, Stockholm

Anders Johansson, Architect, Vice Dean, KTH School of Architecture

The winning pavilion will be built in scale 1:1 inside the Dome of Visions, a structure that results from a collaboration between NCC and KTH. The Dome of Visions will be built by NCC on KTH campus in May 2015.

All design proposals that result from the Studio 4 course work will be exhibited in the Dome of Visions at the end of May. The exhibition will reopen 22 September, to inaugurate the winning pavilion (built inside the dome during the summer), as part of the Inspired by Space Conference at KTH.

*(Photo montage and architectural design:  
Kristoffer Tejlgaard)*

The Dome of Visions will be a curated space (September 2015-September 2016) and a temporary venue where ongoing research, artistic experiments and innovations are exhibited and intertwined with debates, exhibition space, seminars and other public events. The Dome of Visions will also host events from close collaborators such as Uniarts, Konstfack, OpenLab, IVL etc. An overall ambition is to strengthen the brands of the partners, by creating a space for public events that communicates a clear ambition towards innovations that can contribute fruitfully to the development of a sustainable society.

Welcome!
