The „Powertrain Manufacturing for Heavy Vehicles Application Lab“ (PMH Application Lab) is a new research center at KTH with the focus on transferring innovative production technologies into industrial application. We are looking for a dedicated student to support us in our R&D activities.

Your Tasks

Support of the PMH Application Lab staff in the following tasks

- Execution of R&D projects (simulations, experiments, ...)
- Planning and organization of meetings, workshops and conferences with industry
- Preparation of presentations and project documentation

What we offer

- Perfect boundary conditions to gain practical experience parallel to your studies
- Flexible work schedule
- Cooperation with experienced engineers of KTH, Fraunhofer and RISE
- Excellent contacts to our industrial partners
- 6 months contract with the possibility to be extended
- Starting date: 2016-06-01 (earliest), 2016-09-01 (latest)

Your Skills

- Student at KTH in a subject related to mechanical engineering with at least 60hp accomplished (e.g. Maskinteknik, Industriell teknik och hållbarhet, etc.)
- You are a team player and have a high grade of proactivity
- Experience with MS Office and good language skills in English
