

Green Urbanism & Beyond

The Role of Urban Green Space in Urban Planning and Design

Cities all over the world are looking for new ways to incorporate urban green space into their sustainability agendas - but what can green, more sustainable cities look like and how can we work to realise these ideas? How can concepts such as green infrastructure, green and sustainable urbanism and biophilic cities be vehicles in this development?

Green Urbanism & Beyond: The Role of Green Space in Urban Planning and Design is part of the Athena Talks series, annual international one day conferences on a leading urbanism paradigm and its relationship to the phenomenon of urban planning and urban design.

The conference is organized and funded by the Center for the Future of Places (CFP), School of Architecture and the Built Environment, KTH Stockholm, Sweden and is a part of the Graduate Program in Urbanism Studies at KTH Stockholm.

Registration necessary to attend as space is limited. Please send your registration to morganes@kth.se latest by 2nd of June (No show carries a cancellation fee of 250 SEK)

When? 9-17 Friday the 9th of June 2017

Where? Dome of Visions KTH Valhallavägen 79
