

# Wireless Control of Autonomous Submodules in Modular Multilevel Converters

PhD student: Baris Ciftci

Funding: KTH Royal Institute of Technology

Period: 2017 - 2022

## Objective

- Wireless control of submodules in MMC by robust control and modulation methods via low-latency, high-reliability wireless communication

## Publication

- B. Ciftci, J. Gross, S. Norrga, L. Kildehøj and H.-P. Nee, "A proposal for wireless control of submodules in modular multilevel converters," in 2018 20<sup>th</sup> European Conf. on Power Electronics and Applicat., Riga, 2018.
