

# SweGRIDS

Dear All,

SweGRIDS invite PhD or Postdoc project applications from research groups at KTH and Uppsala University. The template for project proposals and the SweGRIDS decision making process together with an overview of the research areas are enclosed. The call is open for all and within all subject areas of the centre. Around 10 projects might be funded. The criteria for selecting a project in SweGRIDS are: scientific quality, energy relevance, a gender equality plan for recruitment (the objective is that at least 34 % of the new recruits are females), support of at least one company among the SweGRIDS partners, consistency with SweGRIDS goals, a relevant project reference group, and subject to available resources in the SweGRIDS centre. Please send your applications to Caroline Öhman ([caroline.ohman@angstrom.uu.se](mailto:caroline.ohman@angstrom.uu.se)) and Rajeev Thottappillil ([rajeev@kth.se](mailto:rajeev@kth.se)) latest by May 11, 2018.

Collaborative projects between KTH and Uppsala University are highly encouraged.

The next SweGRIDS board meeting will be in the morning on May 25, 2018 at Vattenfall, Solna (Street Address: Evenemangsgatan 13). The Board may request the project proposers to make a short pitch of the proposal at the meeting.

Please distribute this call for proposal to any groups in Uppsala University and KTH that you may feel could be interested.

Best Regards,  
SweGRIDS Team
