Please Posters!

- During the break, please place your posters on our Group's File Tab

Assignment 5

On your own, propose the most uniquely different Moverio ++ project you can think of. Do not worry about feasibility at this stage. Be as creative as you can be. The only requirement is that your proposal is something no one else would think of. Write it in under 200 words. Describe who the users are, what the purpose is, what the context of use will be (when, where, how, why, who, for whom, etc). Hand draw some images and create a PDF and send it to me before Thursday 17:00. I want people to read it before Friday.

++ means: "and any other technology you can think of"

Assignment 6

The goal of this assignment is to create four documents on how to present your projects One, including how to run, recover, troubleshoot, and answer technical questions about it. It has two parts. The first part is individual. The second part is in group.

Part 1

1. Write a step-by-step description of how to set up, run, recover, and trouble shoot each of the three projects that are not your own. Do not ask anyone. Do the best you can.
2. Write a script on what to say and in what order to present the three projects that are not your own.
3. Write a number of questions about the project that you have and don't know the answer to.
4. Submit these document here.

Part 2.

1. Create one Google Document per project. Share your files above with project descriptions with everyone that is not part of the project. For example, everyone but 2Pacs share their documents about 2 pacs.
2. Edit and complement each other's knowledge of the project.
3. When you have a completed document, send it to the group members. They will give you feedback, edit your document, fill in the gaps, and submit it here.

Remember: for the Open House, I will create a schedule where I make sure all of you present all the first projects.

Form Groups & Brainstorm

- Try to work with people from different groups
- Mix skills and intended learning outcomes
- Align Interests and project goals
- Propose ideas
- Do the research
 - Papers
 - Technology
 - APIs
- Analyze the ideas
 - Feasible
 - Targeted on Learning

Thank you!
