120 Peer-reviewed scientific papers 1991-2014 (97 papers- 2002-2014): h-index: 31 (googlescholar); RG (Research gate): score 37.26 (Jan-15)

1. Chromium released from leather – I: Exposure conditions that govern the release of chromium(III) and chromium(VI), Y.S. Hedberg, C. Lidén, I. Odnevall Wallinder, Contact Dermatitis, in press

19. *Cell type specific toxicity of metal particles – a focus on the ability of copper-based nanoparticles to induce cell death, mitochondrial damage, DNA damage and oxidative stress in leukemia cells*, Y. Rodhe, S. Skoglund, I. Odnevall Wallinder, Z. Potákováč, L. Möller, submitted to Toxicology in vitro, June 2014

27. *Nickel release and surface characteristics of ultrafine powders of nickel metal and nickel oxide in media of relevance for inhalation and dermal contact*, N. Mazinanian, Y. Hedberg, I. Odnevall Wallinder, Regulatory Pharmacology and Toxicology, 65, 135–146 (2013)
29. Spatial distribution and formation of corrosion products in relation to zinc release for zinc sheet and coated pre-weathered zinc at urban and a marine atmospheric conditions, J. Hedberg, N. Le Bozec, I. Odnevall Wallinder, Materials and Corrosion, 64, 4, 300-308, (2013)
45. Transformation/dissolution studies on the release of iron and chromium from particles of alloys compared with their pure metals and selected metal oxides, Y. Hedberg and I. Odnevall Wallinder, Materials and Corrosion, DOI: 10.1002/maco.201005943, 63, 6, 481-491 (2012)

55. Bioaccessibility, bioavailability, and cytotoxicity in vitro studies of commercially relevant iron- and chromium-based particles – an inhalation scenario, Y. Hedberg, J. Gustafsson, HL Karlsson, L Möller, I. Odnevall Wallinder, Particle and Fibre Toxicology, 7:23 (2010)
57. Particles, sweat and tears. A comparative study on bioaccessibility of ferrochromium and stainless steel particles, the pure metals and their metal oxides in simulated skin and eye contact, Y. Hedberg, K. Midander, I. Odnevall Wallinder, Integrated Environmental Assessment and Management, 6(3), 456-468 (2010)
58. Chromium(III) and chromium(VI) surface treated galvanized steel for outdoor constructions - environmental aspects., D. Lindström, Y. Hedberg, and I. Odnevall Wallinder, Environmental Science and Technology, 44, 4322–4327 (2010)

60. Storm water runoff measurements of copper from a naturally patinated roof and from a parking space. Aspects on environmental fate and chemical speciation.

64. Metal release rate from AISI 316L stainless steel and pure Fe, Cr and Ni into a synthetic biological medium- a comparison, G. Herting, I. Odnevall Wallinder, C. Leygraf, Journal of Environmental Monitoring, 10(9), 1092-1098, (2008)

103. Seasonal variations in copper corrosion rate and runoff rate in an urban and a rural atmospheric environment, I. Odnevall Wallinder, C. Leygraf, Corrosion Science, 43/12, 2379 (2001)

105. Can metal run off from roofs have an environmental effect? Sundberg R, Odnevall Wallinder I, Metall, 55 (7-8) 439-441 (2001)

106. A laboratory study of copper and zinc runoff during first flush and steady state conditions, W. He, I. Odnevall Wallinder, C. Leygraf, Corrosion Science, 43(1), 127 (2001)

107. Effects of exposure direction and inclination on the runoff rates of zinc and copper roofs, I. Odnevall Wallinder, P. Verbiest, W. He, C. Leygraf, Corrosion Science, 42(8), 1471 (2000)

Main supervisor of the following PhD (6) and Licentiate (7) theses

2) Selected peer-reviewed conference proceedings and reports (2002-2015)

5. The role of microstructure on initial corrosion and metal release of Cu-Zn alloys in a chloride-containing laboratory atmosphere. X. Zhang, I. Odnevall Wallinder, C. Leygraf, Eurocorr 2014, Sep. 8-12, Pisa, Italy, 2014

8. Undersökning av risker med spridning av silvernanopartiklar från avloppsslamben är åkermark

11. **Trojan Horse type mechanism: Cellular dose and toxicity of Ag and CuO nanoparticles**, P. Cronholm, H.L. Karlsson, J. Hedberg, T. Lowe, K. Elihn, I. Odneval Wallinder, L. Möller, **48th Congress of the European-Societies-of-Toxicology (EUROTOX)**, Stockholm, Sweden, June 17-20, 2012

15. **Surface structure of 55% Al-Zn alloy coating and corrosion product distribution after exposure in chloride-containing electrolytes**, Xian Zhang, Ping Qiu, Christofer Leygraf and Inger Odneval Wallinder, **The 10th International Conference on the Structure of Surfaces (ICSOS-10)**, Aug 1-5., Hong Kong, China, 2011

19. **Copper nanoparticles are highly cytotoxic and interact with hemoglobin**, H.L. Karlsson, P. Cronholm, J. Gustafsson, K. Midander, I. Odnevall Wallinder, L. Möller, **4th International Conference on Nanotechnology, Occupational and environmental health**, Aug 26-29, 2009

22. **Bioaccessibility of antimony released from four different antimony compounds in synthetic biological media.** Y. Hedberg, T. Jiang and I. Odnevall Wallinder, Commissioned by International Antimony Association (i2a) (on behalf of the Silica fume-consortium) (2010)

24. **Material characterization and elemental release studies in synthetic biological media, and in the OECD Transformation Dissolution protocol media of Silicon.** G. Herting, T. Jiang, I. Odnevall Wallinder, Commissioned by Euroalliages (on behalf of the Silicon-consortium) (2010)

25. **Material characterization and elemental release studies in synthetic biological media, and in the OECD Transformation Dissolution protocol media of a ferrosilicocalcium alloy.** G. Herting, T. Jiang, I. Odnevall Wallinder, Commissioned by Euroalliages (on behalf of the CaSi-consortium) (2010)

26. **Material characterization and elemental release studies in synthetic biological media, and in the OECD Transformation Dissolution protocol media of Ferrosilicon alloys.** G. Herting, T. Jiang, I. Odnevall Wallinder, Commissioned by Euroalliages (on behalf of the FeSi-consortium) (2010)

27. **Bioaccessibility of zirconium and titanium released from different zirconium and titanium compounds in synthetic biological media.** I. Odnevall Wallinder and Y. Ullmann, Internal report commissioned by QIT Fer et Titane, RTIT Centre de Technologie, Canada (2009)

28. **Bioaccessibility of molybdenum released from pure molybdenum and different molybdenum compounds in synthetic biological media.** I. Odnevall Wallinder and Y. Ullmann, Internal report commissioned by the International Molybdenum Association, IMOA (2009)

29. **Bioaccessibility studies of silver and silver compounds in synthetic biological media.** K. Midander, I. Odnevall Wallinder, Internal report commissioned by the EBRC GmbH (2008)

30. **Bioaccessibility studies of commercially available tin metal particles (2-11 µm) in synthetic biological media.** K. Midander, I. Odnevall Wallinder, Internal report commissioned by the ITRI Ltd on behalf of the REACH Tin Metal Consortium (2008)

33. **Orientating analysis of bioaccessibility of different metals released from various Ti slag materials in synthetic biological media.** K. Midander, I. Odnevall Wallinder, C. Leygraf, Commissioned by UGI (Upgraded Ilmenite) REACH Committee (2007)

**Popular science papers and presentations (2002-2015)**

1. **Compliance tests or stainless steel as a food contact material using the CoE test guideline,** Y. Hedberg, N. Mazinanian, I. Odnevall Wallinder, International Stainless Steel Forum, ISSF, internal webpage, 2015

2. **Surface properties of metal particles,** Key note speaker, I. Odnevall Wallinder, Höganäs Powder Symposium, Örenäs Slott, Nov 17-18, 2014
9. Spridning av metaller och nanopartiklar från konsumentprodukter, Invited lecturer at the national workshop on Nanopartiklar i miljön - riskerna med belastningen av nanopartiklar från konsumentprodukter och vägtransporter, IVL Svenska Miljöinstitutet, 3 maj 2012
11. Copper architecture and the environment, Interview of Prof. Odnevall Wallinder by Chris Hodson, Copper Architecture Forum, 31, 32-33, 2011
17. Metals and alloys in external constructions – environmental interactions, Nacka Kommun, March 27, 2009
18. Metals and alloys in external constructions – changes in speciation and bioavailability of corrosion-induced metal runoff upon environmental entry, Statens Fastighetsverks Kulturarvsenhet, March 2, 2009
19. Corrosion- not only a material-related topic, Open lecture, Seminar Series: Chemical Science and Engineering, Jan 30, 2009
23. Metal release from particles and potential health effects, Open lecture, Royal Institute of Technology, April 23, 2008
25. Modelling of copper flows into soil and water, Meeting of the Roofing Environmental Affairs task force-European copper institute, Budapest, June 4, 2007
33. *Corrosion-induced copper runoff from building materials*, Meeting of the Roofing Environmental Affairs task force – European Copper in Architecture Campaign, European Copper Institute, Barcelona, Spain, June 28, 2006
34. *Nygamal nanoteknik-passivfilmer på rostfria stål*, C. Olsson, G. Herting, I. Odnevall Wallinder, Bergsmannen 6, 16-17, 2005
39. *Modelling of copper flows into soil and water*, Meeting of the Roofing Environmental Affairs task force-European copper institute, Luxemburg, June 27, 2005
42. *Environmental interaction of copper runoff from external structures*, Meeting of the Roofing Environmental Affairs task force - European copper institute, Edinburgh, UK, June 8, 2004
46. **Environmental aspects of metal runoff from external surfaces**, Committee of European Environmental Engineering Societies, Technical Advisory Board on Climatic and Atmospheric Pollution Effects on Materials and Equipment, Helsinki, Sept. 18, 2003

47. **Environmental aspects of copper runoff**, Meeting of the Roofing Environmental Affairs task force - European copper institute, Athens, Greece, June 3, 2003

**Conferences (selected 2002-)**

25. “Copper nanoparticles are highly cytotoxic and interact with hemoglobin”, H.L. Karlsson, P. Cronholm, J. Gustafsson, K. Midander, I. Odnevall Wallinder, L. Möller, 4th International Conference on Nanotechnology, Occupational and environmental health, Aug 26-29, 2009
27. “Long-term barrier effects of Cr(III) and Cr(VI) treated zinc surfaces from a metal runoff perspective”, I. Odnevall Wallinder, D. Lindström, Proc European General Galvanizers Association, Assembly meeting, Copenhagen, Denmark, June 10, 2008
37. “Long-term barrier effects of Cr(III) and Cr(VI)-treated zinc surfaces from a metal release perspective”, I. Odnevall and D. Lindström, European General Galvanizers Association, Assembly Meeting, Copenhagen, Denmark, June 10, 2008
42. Wax Based Antigraffiti Coatings on Artificially Patinated Copper: Effects on Copper Release and Patina Composition, S. Goidanich, I. Odnevall Wallinder, , Conservation Science 2007, 10-11 May (2007), Politecnico di Milano, Milano, Italy
43. “Release of main metal constituents from alloys and the pure metals”, Poster, Towards the city surface of tomorrow”, Institute for Water Quality, Resources, and Waste Management, Vienna University of Technology, Federal Ministry of Agriculture, Forestry, Environment and Water Management, June 8-9, Vienna, Austria, 2006
47. "Long-term corrosion induced copper runoff from natural and artificial patina and its environmental fate in soil” Poster, SETAC Europe, 15th Annual Meeting, 22-26 May, Lille, France, 2005
48. “Environmental impact of copper dispersion from external structures”, SETAC Europe 14th Annual Meeting, Prague, Czech Republic, 18-22 April, 2004
52. “A model for predicting copper runoff rates – current activities”, UN/ECE Convention on long-range transboundary air pollution, Workshop on Release of heavy metals due to corrosion of materials, Munich Germany, May 12-14, 2003
53. “Immobilization of copper in runoff water from roofing materials by limestone, soil and concrete”, UN/ECE Convention on long-range transboundary air pollution, Workshop on Release of heavy metals due to corrosion of materials, Munich Germany, May 12-14, 2003
55. “Environmental effects of metals induced by atmospheric corrosion”, Symposium on Nanostructured Materials – focusing on contributions by Women in Materials Science, KTH-175 years, KTH, April 11, 2002
