

6. Copper-based nanoparticles induce high toxicity in promyelocytic HL60 cells, Y. Rodhe, S. Skoglund, I. Odnevall Wallinder, Z. Potácová, L. Möller, Toxicology in vitro, revised Feb. 2015

8. Particle Characteristics Modulating the Toxicity of Nickel and Nickel Oxide Particles in Nano- and Micron-Size, S. Latvala, J. Hedberg, L. Möller, I. Odnevall-Wallinder, K. Elihn, H.L. Karlsson, Archives of Toxicology, submitted March 2015

9. Can cobalt(II) and chromium(III) ions released from joint prostheses influence the friction coefficient?, Y. S. Hedberg, M. Pettersson, S. Pradhan, I. Odnevall Wallinder, M. Rutland, C. Persson, ACS Biomaterials, submitted April 2015

15. Mechanism-based genotoxicity screening of metal oxide nanoparticles using the ToxTracker panel of reporter cell lines, H.L. Karlsson, A. R. Gliga, F. Calléja, C. Gonçalves, I. Odnevall Wallinder, H.

citing’s in the papers in the UK,

BBS interview: http://www.bbc.co.uk/programmes/p019p6cd

34. Nickel release and surface characteristics of ultrafine powders of nickel metal and nickel oxide in media of relevance for inhalation and dermal contact, N. Mazinian, Y. Hedberg, I. Odnevall Wallinder, Regulatory Pharmacology and Toxicology, 65, 135–146 (2013)

36. Spatial distribution and formation of corrosion products in relation to zinc release for zinc sheet and coated pre-weathered zinc at urban and a marine atmospheric conditions, J. Hedberg, N. Le Bozec, I. Odnevall Wallinder, Materials and Corrosion, 64, 4, 300-308, (2013)

43. Influence of surface oxide characteristics and speciation on corrosion, electrochemical properties and metal release of atomized 316L stainless steel powders, Y. Hedberg, M. Norell, P. Linhardt, H.

84. Metal release from various grades of stainless steel exposed to synthetic body fluids G. Herting, I. Odnevall Wallinder, C. Leygraf, Corrosion Science 49, 103-111 (2007)
93. A comparison of release rates of Cr, Ni and Fe from stainless steel alloys and the pure metals exposed to simulated rain events, G. Herting, I. Odnevall Wallinder, and C. Leygraf, Journal of
**Electrochemical Society,** 152(1), B23-29 (2005)

110. **Seasonal variations in copper corrosion rate and runoff rate in an urban and a rural atmospheric environment**, I. Odnevall Wallinder, C. Leygraf, *Corrosion Science*, 43/12, 2379 (2001)

112. **Can metal run off from roofs have an environmental effect?** Sundberg R, Odnevall Wallinder I, *Metall*, 55 (7-8) 439-441 (2001)

Main supervisor of the following PhD (6) and Licentiate (7) theses

Co-supervisor of the following PhD theses
P. Qiu, Doctoral thesis, "Quantified In Situ Analysis of Initial Atmospheric Corrosion: Surface heterogeneity, galvanic effects and corrosion product distribution on zinc, brass and Galvalume", June 14, 2011

2) Selected peer-reviewed conference proceedings and reports (2002-2015)

13. *Relevance of in vitro studies for in vivo inhalation toxicity of 316L powder*

16. Surface structure of 55% Al-Zn alloy coating and corrosion product distribution after exposure in chloride-containing electrolytes, Xian Zhang, Ping Qiu, Christrofer Leygraf and Inger Odnevall Wallinder, The 10th International Conference on the Structure of Surfaces (ICSOS-10), Aug 1-5., Hong Kong, China, 2011

20. Copper nanoparticles are highly cytotoxic and interact with hemoglobin, H.L. Karlsson, P. Cronholm, J. Gustafsson, K. Midander, I. Odnevall Wallinder, L. Möller, 4th International Conference on Nanotechnology, Occupational and environmental health, Aug 26-29, 2009

23. Bioaccessibility of antimony released from four different antimony compounds in synthetic biological media, Y. Hedberg, T. Jiang and I. Odnevall Wallinder, Commissioned by International Antimony Association (i2a) (on behalf of the Silica fume-consortium) (2010)

27. Material characterization and elemental release studies in synthetic biological media, and in the OECD Transformation Dissolution protocol media of Ferrosilicon alloys, G. Herting, T.Jiang, I. Odnevall Wallinder, Commissioned by Euroalliages (on behalf of the FeSi-consortium) (2010)
28. Bioaccessibility of zirconium and titanium released from different zirconium and titanium compounds in synthetic biological media, I. Odnevall Wallinder and Y. Ullmann, Internal report commissioned by QIT Fer et Titane, RTIT Centre de Technologie, Canada (2009)

29. Bioaccessibility of molybdenum released from pure molybdenum and different molybdenum compounds in synthetic biological media, I. Odnevall Wallinder and Y. Ullmann, Internal report commissioned by the International Molybdenum Association, IMOA (2009)

31. Bioaccessibility studies of commercially available tin metal particles (2-11 µm) in synthetic biological media, K. Midander, I. Odnevall Wallinder, Internal report commissioned by the ITRI Ltd on behalf of the REACH Tin Metal Consortium (2008)

34. Orientating analysis of bioaccessibility of different metals released from various Ti slag materials in synthetic biological media, K. Midander, I. Odnevall Wallinder, C. Leygraf, Commissioned by UGI (Upgraded Ilmenite) REACH Committee (2007)

Popular science papers and presentations (2002-2015)

2. Compliance tests or stainless steel as a food contact material using the CoE test guideline, Y. Hedberg, N. Mazinanian, I. Odnevall Wallinder, International Stainless Steel Forum, ISSF, internal webpage, 2015

5. Metaller, miljö och myter; invited lecturer at the Norwegian conference for 350 architects and building constructors, Metall 13, Oslo, Nov 6, 2013

7. Spridning av metaller och nanopartiklar från utomhuskonstruktioner och konsumentprodukter, Presentation, Fredagsforum – Länstyrelsen, Stockholm, 8 dec., 2012

10. Spridning av metaller och nanopartiklar från konsumentprodukter, Invited lecturer at the national workshop on Nanopartiklar i miljön - riskerna med belastningen av nanopartiklar från konsumentprodukter och vägtransporter, IVL Svenska Miljöinstitutet, 3 maj 2012
11. **Metaller, miljö och myter:** Invited lecturer at the national conference for 350 architects and building constructors, PLÅT 12, Malmö Högskola, Malmö, Feb. 2, 2012
12. **Copper architecture and the environment,** Interview of Prof. Odnevall Wallinder by Chris Hodson, Copper Architecture Forum, 31, 32-33, 2011
15. **Health effects of metal particles – research at the Stockholm Particle group, KTH, Oral presentation at YKI in connection to ”Integrating Nanomaterials in Formulations” – NanoFormulation 2010, June 9, 2010
18. **Metals and alloys in external constructions – environmental interactions,** Nacka Kommun, March 27, 2009
19. **Metals and alloys in external constructions – changes in speciation and bioavailability of corrosion-induced metal runoff upon environmental entry,** Statens Fastighetsverks Kulturarvsenhet, March 2, 2009
20. **Corrosion- not only a material-related topic,** Open lecture, Seminar Series: Chemical Science and Engineering, Jan 30, 2009
23. **Bioaccessibility and surface reactivity of nano- and micron-sized particles,** Course on ”the health risk assessment of metals, their alloys and compounds under REACH, Finnish Institute of Occupational Health, Helsinki, Sept. 29, 2008
24. **Metal release from particles and potential health effects,** Open lecture, Royal Institute of Technology, April 23, 2008
26. **Modelling of copper flows into soil and water,** Meeting of the Roofing Environmental Affairs task force-European copper institute, Budapest, June 4, 2007
28. **Passive films on stainless steel – recent nano-range research,** C. Olsson, G. Herting, I. Odnevall Wallinder, Acom (Outokumpu’s Scientific magazine about Stainless), 2, 15, 2006
29. **Vilken inverkan på miljön har metallavvinning från utomhuskonstruktioner,** Sunda Hus, Miljöarbete i praktiken, Tyrénhuset, Stockhol, Nov. 22, 2006.
30. **Release of main metal constituents from alloys and the pure metals,** Poster, Towards the city surface of tomorrow”, Institute for Water Quality, Resources, and Waste Management, Vienna University of Technology, Federal Ministry of Agriculture, Forestry, Environment and Water Management, June 8-9, Vienna, Austria, 2006
31. **Release of main metal constituents from alloys and the pure metals,** Poster, Towards the city surface of tomorrow”, Institute for Water Quality, Resources, and Waste Management, Vienna University of Technology, Federal Ministry of Agriculture, Forestry, Environment and Water Management, June 8-9, Vienna, Austria, 2006

34. Corrosion-induced copper runoff from building materials, Meeting of the Roofing Environmental Affairs task force – European Copper in Architecture Campaign, European Copper Institute, Barcelona, Spain, June 28, 2006

35. Nygammal nanoteknik-passivfilmer på rostfria stäl, C. Olsson, G. Herting, I. Odnevall Wallinder, Bergsmann 6, 16-17, 2005

37. Runoff and fate of zinc from outdoor constructions - Selected results from a five-year exposure programme (short summary”), I. Odnevall Wallinder, S. Bertling and C. Leygraf, Protective Coatings Europe, Sep., 2-4, 2005

40. Modelling of copper flows into soil and water, Meeting of the Roofing Environmental Affairs task force-European copper institute, Luxembourg, June 27, 2005

41. Release of chromium, nickel and iron from pure samples of the metals and 304 and 316 stainless steel induced by atmospheric corrosion. A combined field and laboratory study, I. Odnevall Wallinder, S. Bertling, G. Herting and C. Leygraf, ACOM (A corrosion management and applications engineering magazine from Outokumpu Stainless), 2, 2004

42. Kan miljöeffekter påvisas från utomhuskonstruktioner i rostfritt stål?, I. Odnevall Wallinder, S. Bertling, C. Leygraf, Bygg & Teknik, 2004

43. Environmental interaction of copper runoff from external structures, Meeting of the Roofing Environmental Affairs task force - European copper institute, Edinburgh, UK, June 8, 2004

44. Påverkar metaller i utomhuskonstruktioner vår miljö, Stål 2004, Borlänge, May 7, Swedish Steel Association, 2004

47. Environmental aspects of metal runoff from external surfaces, Committee of European Environmental Engineering Societies, Technical Advisory Board on Climatic and Atmospheric Pollution Effects on Materials and Equipment, Helsinki, Sept. 18, 2003

48. Environmental aspects of copper runoff, Meeting of the Roofing Environmental Affairs task force - European copper institute, Athens, Greece, June 3, 2003

Conferences (selected 2002-)

25. “Copper nanoparticles are highly cytotoxic and interact with hemoglobin”, H.L. Karlsson, P. Cronholm, J. Gustafsson, K. Midander, I. Odnevall Wallinder, L. Möller, 4th International Conference on Nanotechnology, Occupational and environmental health, Aug 26-29, 2009

27. “Long-term barrier effects of Cr(III) and Cr(VI) treated zinc surfaces from a metal runoff perspective”, I. Odnevall Wallinder, D. Lindström, Proc. European General Galvanizers Association, Assembly meeting, Copenhagen, Denmark, June 10, 2008

34. “Long-term barrier effects of Cr(III) and Cr(VI)-treated zinc surfaces from a metal release perspective”, I. Odnevall and D. Lindström, European General Galvanizers Association, Assembly Meeting, Copenhagen, Denmark, June 10, 2008

44. “Release of main metal constituents from alloys and the pure metals”, Poster, Towards the city surface of tomorrow, Institute for Water Quality, Resources, and Waste Management, Vienna University of Technology, Federal Ministry of Agriculture, Forestry, Environment and Water Management, June 8-9, Vienna, Austria, 2006
48. "Long-term corrosion induced copper runoff from natural and artificial patina and its environmental fate in soil” Poster, SETAC Europe, 15th Annual Meeting, 22-26 May, Lille, France, 2005
49. “Environmental impact of copper dispersion from external structures”, SETAC Europe 14th Annual Meeting, Prague, Czech Republic, 18-22 April, 2004
53. “A model for predicting copper runoff rates – current activities”, UN/ECE Convention on long-range transboundary air pollution, Workshop on Release of heavy metals due to corrosion of materials, Munich Germany, May 12-14, 2003
54. “Immobilization of copper in runoff water from roofing materials by limestone, soil and concrete”, UN/ECE Convention on long-range transboundary air pollution, Workshop on Release of heavy metals due to corrosion of materials, Munich Germany, May 12-14, 2003
56. “Environmental effects of metals induced by atmospheric corrosion”, Symposium on Nanostructured Materials – focusing on contributions by Women in Materials Science, KTH-175 years, KTH, April 11, 2002
