

Title of the position

Dear Sir or Madam,

I am writing to apply for the position as a Purchasing Specialist at Company X assembly plant in Town X. By applying for this position I would like to take yet another step towards a long and highly developing career at Company X.

Ever since I was a young boy I have always had a genuine interest for cars. Actually, most of my decisions in life have been based on my pure fascination of automobiles. My first internship was at a car workshop where I was taught about the different car components. As a final project in high school I programmed a driverless car and I wrote my master thesis about supply chain partnerships at Company Y, broadening my experience in the field of strategic automotive sourcing. I have also worked as a Product Specialist at the Company X showroom in Stockholm, experiencing the fast pace of operations as well as the quick and continuous expansion of Company X in country Z.

During the past five years I have been studying Mechanical Engineering (BSc) and Industrial Management (MSc) at the Royal Institute of Technology (KTH) in Stockholm, Sweden. Throughout my education I have earned both an in depth technical understanding about vehicles and how they work, as well as great knowledge in the field of purchasing and supply chain management. As a part of my education I have also attended specific training sessions at industry leading Z and N with focus on lean manufacturing and supply chain management.

Besides my studies I have been working a lot in different industries, both with focus on B2B as well as B2C. I created one of my first jobs myself by becoming the founder and owner of a fishing lure company. I am until this day responsible for all the different operations ranging from sales and marketing to sourcing and development of new lures. Over the years I have been working with more than 15 suppliers from 3 different continents and developed more than 50 different lure models. This process has taught me a lot about the sourcing process and the importance of supplier benchmarking and negotiation. Even though fishing lures are a completely different product from electric vehicles, I am sure that a lot of my experience can be used when working with sourcing at Company X.

There are many great car manufacturers out there, but Company X is not only making unique and innovative sports cars, they are making the best battery electric vehicles on the market as well as adapting the infrastructure to electric vehicles with the Supercharger stations. As an entrepreneur and innovator I have great respect for groundbreaking companies such as Company X and it would be an honor to be a part of the company's expansion and evolution. For me, Company X is more than just a sports car, it's a sustainable concept and a lifestyle that I hope to be a part of in a near future.

Thank you for considering my application. I look forward to your positive response and once again becoming a part of the team of pioneers in the field of superior electric vehicles.

Sincerely
