

KTH Computer Science
and Communication

Agreement concerning degree project

This is an agreement between the provider of the project

.....
and CSC, the school of Computer science and communication at KTH (or Nada, SU) and concerns the degree project for

.....
Starting date for the project:.....

The degree project is a part of the education at KTH (or SU) and corresponds to 20 weeks of full time work including literature studies and report writing. CSC examines the work which includes checking for academic quality. This means that CSC puts demands on the task, on the planning and the work process as well as on the oral presentation and on the written report on the work. The main part of the work must be a thorough analysis of a problem within the subject area. Only a small part of the work may be routine work (e.g. code writing) and then as a support for the analysis. The student must attend certain seminars at CSC.

The work should be presented in an academic report which is public and normally is published on the CSC web pages.

The work should start out with planning and literature studies. The student should study the problem domain by reading literature – mainly research literature and academic text books. The literature studies usually take around 4 weeks but may take longer or shorter time depending on the problem domain (2–6 weeks is normal). The student should also make a detailed project plan including a time table. This project plan should be approved of by CSC and the provider of the project within a month from the time when the project is started (special conditions may call for a later date). If the parties can not agree upon this project plan, this agreement, signed below, is cancelled.

The student is responsible for following the project plan and the time plan – any changes should be made in agreement with CSC and the provider of the project.

The provider of the project is responsible for giving the student enough practical support. CSC is responsible for giving the student academic guidance.

The provider of the project is responsible for providing the student with a place to work and all necessary equipment.

The provider of the work agrees not to ask the student to do work outside of the project, except maybe to a very small extent, before the student has spent 20 weeks working on the project.

More information on the CSC routines for master's projects is found at <https://www.kth.se/social/group/examensarbete-vid-cs/page/what-is-a-degree-project-30hp-at-csc/>
