

Homework 0: Calculating your group number

Your date of birth

Write down your date of birth in the following format:

YYMMDD

...where YY is the year, MM is the month and DD is the day.

If you were born on April 16th 1987 your answer would be

870416

Group number

Your group number is a function of your birthdate: $(YY * MM + DD) \bmod 12$

So if you were born on April 16th 1987 your group number would be

$(87 * 4 + 16) \bmod 12 = 364 \bmod 12 = 4$

Handing in your solution

Please save your solution as a pdf file and hand it in on the peergrade page.

Peer grading

You will be asked to check the group number calculations of three other students (anonymously). Your own solution will also be checked in this way.

Good luck!
