

Stockholm PhD Student Dialogue on Sustainability 2013

On October 17th, 2013 40 PhD-students from the Stockholm region gathered at KTH to discuss the future of Stockholm's sustainable urban and regional development. The Stockholm PhD Student Dialogue was organized by PhD students at KTH together with KTH-Sustainability as a means to increase and strengthen research collaboration across disciplinary and institutional boundaries.

Interview

Interview (in Swedish) with [Kristina Östman](#), PhD student at KTH stresses the importance of transdisciplinary research collaboration for sustainable development.

Theme

The overall theme of the dialogue was: *How to promote a sustainable Stockholm urban and regional development?*

Roundtable discussions addressed diverse subtopics under this theme including: climate change, future energy mix, planning for sustainable cities, production and consumption, transition to a sustainable society, transportation and water management.

Awards

A poster prize of 10,000SEK was awarded to [Oksana Udovyk](#) from Södertörn University for her interactive approach to scientific communication. In addition, applications for cross institutional project funding were submitted by the roundtable participants. These
