AUTHORITY

- Institutional review of the HEIs' quality assurance processes
- From observation report, March 2020, about KTH:
 - "The institution works systematically to increase the commitment, where the faculty assembly, storträffarna, PriU groups and several other networks are means to increase commitment and participation."
 - "At the site visits there were several persons who argued that the university has a big organization and it's difficult to reach out and create commitment among all. The assessment group is aware of the difficulties and argues that there is evidence that there are systematic efforts to reach out (...). Not the least, the storträffar has developed well and has become an important arena for communication"

Alla bordsledare, Leif Kari och storträffskommittén kommer att ha ett uppföljningsmöte i augusti och diskutera hur diskussionerna ska tas vidare samt hur storträffen den 3 december 2020 ska utformas.
