

# Study Plan Double Degree Students Engineering Physics

Name:	Date of birth:
Home University:	Start year at KTH:

**Study profile/specialisation**

Engineering Physics       Nuclear

Version:

Date:

Course code + application code	Course name	Credits	Study period (1, 2, 3, 4)
<b>Semester 1 (autumn semester, period 1 and 2)</b>			
<b>Semester 2 (spring semester, period 3 and 4)</b>			
<b>Semester 3 (autumn semester)</b>			
Degree project (name and course code):		30	

Technical/science courses – 60 credits of technical courses (majority from your specialisation), including a theory and methodology course and SA2003 Sustainable Development in Engineering Physics 1.5 credits. The degree project course code should also be added in the study plan but has a separate application form. Please note that you need to meet both the general and specific requirements for the degree project course code you intend to follow. Please note that you can only include one extra course above the 90 credits in your study plan (97, 5 max), and please mark this course as “the extra”.”

Total number of credits:

Approved KTH
