

KTH Electrical Engineering

OPTIONS FOR RURAL ELECTRIFICATION IN DEVELOPING COUNTRIES

A Case Study in Kisiizi, Uganda

Mikael Amelin

KTH Electrical Engineering

BACKGROUND

- Electricity supply is vital to modern society.
- Around 2 billion people lack access to public electricity supply.
- Rural electrification must be economically and environmentally sustainable.

KTH Electrical Engineering

OBJECTIVES

- Overview of power source options for rural electrification.
- Development of planning methods for rural electrification.
- Apply the planning method in a case study (Kisiizi in southwestern Uganda).
