KTH F2, Kanapés, ramlösa and coffe

Take the opportunity to discuss with the
CEO of Fortum!

FORTUM

Energy from the sun can be utilised either directly, as solar electricity and heat, or indirectly, as hydro, wave, wind and bioenergy, and geothermal heat. **Fortum has invested** in several **solar energy** demonstration and research projects under way to tap into its enormous potential.

Tapio Kuula has worked at Fortum since 1996 and has been member of the Management Team since 1997. His responsibility areas have been Generation, **Portfolio Management and Trading (PMT)**, Service and **Russian operations**, and recently in the integration of the Russian TGC-10. Prior to Fortum, Kuula has worked at forest industry and as President and CEO of various energy companies. He holds Master's degrees in engineering and economics.
