1. The course was useful and interesting. 1. Do not agree at all ... 5. Agree completely.

17 svarande

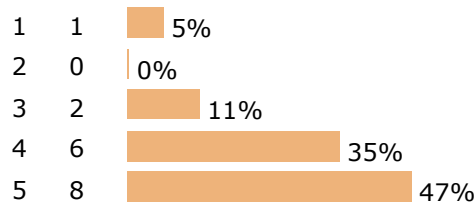

- It is useful but the interesting is depending on the peopel (1)
- Very interesting course. It was good to be able to apply theoretical courses to a real-application. (5)
- I have improved my programming skills. (5)
- It is really intersting working in android application. (5)
- Really Interesting i will recommand it to other (5)

2. Is there anything that could be done to make the course more interesting ?

- more group showing chances
- Have more diverse projects to suit everyone"s interest.
- I think each group should have its own topic, not two groups do the same one
- iphone application maybe more interesting.
- make smaller groups
- More support from peopel who exactly working in the area.
- different group may have different title
- Add some more seminar can be better
- I think it"s already really interesting
- it is already good.
- More lectures about the working environment (JAVA etc)
- no

3. The course learning outcomes have been fulfilled.

17 svarande

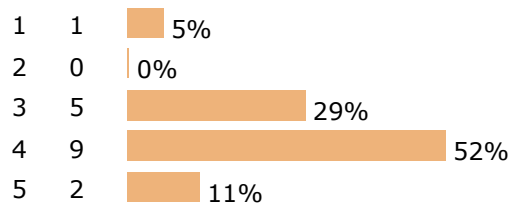

- I can say I have learned what was expected. (4)
- n/a (4)

4. What could be done in order to reach the learning outcomes better?

- show something that can show the individual work. Because not all the people in the group are productive.
- More individual assignments
- Set small tasks into the who project.
- We have got enough support to fullfill the learning outcomes.
- everything is already good
- more lecture or seminar be gave
- Maybe more feedback from Assistant teacher because with figure out a problem regarding gain the day of the presentation
- no
- More guidance
- more guidance.

5. Your prerequisites were adequate.

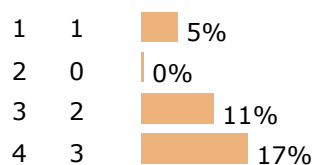

17 svarande

- I don't know much about the java programming in the beginning of the course. (3)
- What was new for me was android os. But the framework give was so much helpful for that. And also the lecture on this area was nice. (4)

6. EE has given a correct description of the course - the course is what I expected.

17 svarande

5 11  64%

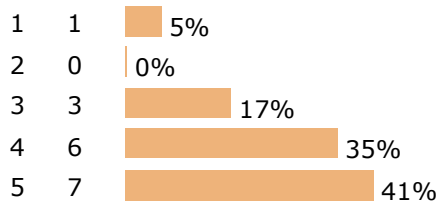

- *Acutally it was even better than what I expected (provided material, total liberty of organisation)*
(5)

7. Is there anything that EE could do to better describe the course to potential students ?

- *EE did quite good*
 - *I think it was enough*
 - *Insist of the fact that it is a really important project. Even if we are totally of organizing our work, it requires to spend a lot of time,much more than a normal course. This actually justifies that it is worth 12 credits ECTS.*
 - *Maybe give out the theme of the project before we choose the course.*
 - *It can be more intersting if EE mänge to incorport computer science students for a better performance in programming.*
 - *everything is clear now*
 - *n/a*
 - *no*
 - *I think it was fine*
 - *no*
-

8. The information (lectures, web and other) on the project management and requirements was good and enough.

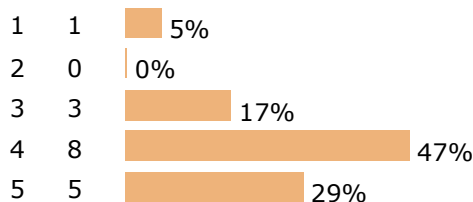

17 svarande

- *The lectures a good basis to continue for our work but we needed to learn a lot by ourselves (which is also good)* (4)

9. The lectures on smart-phone/android programming were good.

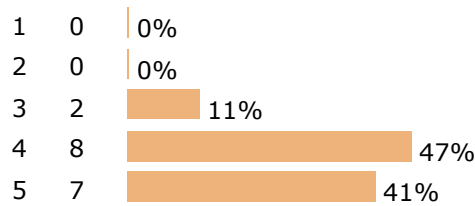

17 svarande

- *Maybe can give more lectures and start from the low level first.* (3)
 - *I guess it was, but i was not really involved the android programming part* (4)
 - *Was too short.* (4)
 - *n/a* (4)
-

10. The android support section on the webpage was good.

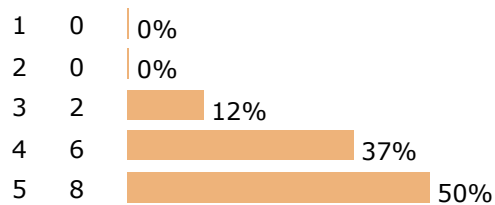

17 svarande

- it was good but not enough (3)
 - Yes, but in general we could find information just by googling it. (4)
 - n/a (4)
-

11. The smart-phone/android support was good.

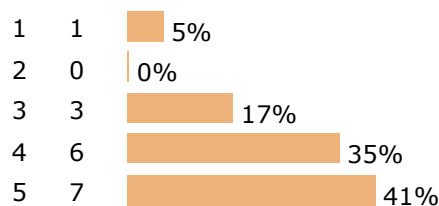

16 svarande

- n/a (3)
 - What a good support and the answers to our problems were accurate and useful. (4)
 - start from the low level maybe better. (4)
-

12. The teacher responsible for the course was good.

17 svarande

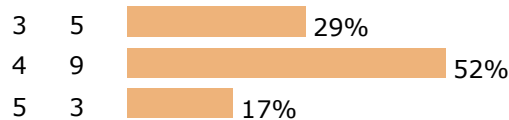

- He gave us good directions but we were quite autonomous. He was not too much involved but it was a good compromise for this kind of project. (4)
 - n/a (4)
 - He has given us much help. (5)
-

13. Our project assistant(s) was good

17 svarande

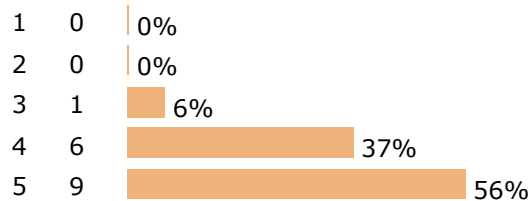

- can show in the lab more frequent (3)
 - They were mostly listening to us, I mean little advice. We didn't really if what we were doing was good or not. Maybe it is because we were not taking a wrong direction in our work. (3)
 - There were good but sometimes we did not really know if we were going in the good direction or if our work was good enough. (4)
 - They listen to us and give us suggestions. (4)
 - It would have more good if the assistance were working in the area(fingerprint). (4)
 - n/a (4)
 - But we needed more feedback maybe on how to process. We were not really guided and provided during all the project our own approach which might be good (4)
-

14. The computer support was good ?

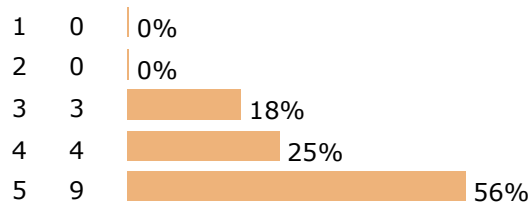

16 svarande

- n/a (4)
-

15. The work load correspons to a twelve credit course.

16 svarande

- Personnaly, I worked a lot on this project so maybe 12 credits is not enough. But the course was very interesting so it does not really matter. (3)
 - I have the feeling to have work for more than 18 credits which is good by the way (3)
 - The work load is a little bit high. (4)
 - n/a (4)
 - I think i spent whole days in these two months (5)
-

16. What was the best aspect of the course ?

- self-motivation
- The team work and the possibility to apply the theory
- improve my programming skill and teamwork
- Android application.
- I learnt many new things by experiments. This lead to more knowlage. This is the best part of this course. Against other courses it was not just teacher orianted. Students are more participet.

- It was really challenging and having a real application working at the end is really nice.
 - The liberty of organisation. Working on a "leading edge" project (topic: indoor positioning and material: android)
 - We can learn much from this course.
 - Working in android application.
 - group work, useful in the real world, programming
 - freedom for the time arrangement
 - The innovative part using Android and Java! Really interesting
 - Working on something practical
 - working with other guys.
-

17. Is there something that has not functioned well or should be changed/removed from the course?

- maybe not judged by these report. Should have some paper test or something
 - Not really
 - it is needed more help from assistances.
 - The video or at least the way we did it was not very useful.
 - It is good.
 - no
 - also no same title in different group
 - there is some limitaion from the hardware that is really hard to find
 - Communication between Groups and Teacher/Assistant.
 - no
 - no
 - no
-

18. What is your experience from working in a project group ?

- should communicate all the time making people working together
 - The experience of working in a group of different cultures and nationalities is a very good experience, it gives you an open mind and you learn how to better communicate with others
 - make a good communication with all the other members in the group
 - It is good to exchange the ideas. However, sometimes it is also not so efficient if we just argue and do not take action.
 - Learnt new things in experimental way.
 - It is quite difficult since people do not have the same knowledge and abilities. It is necessary to find compromises so that everybody can try his ideas. I also learnt a lot about working with people of different nationalities. The point of views and the way of working were quite different.
 - You have to adapt to other group members (skills, expectations, decisions). It is the first time i was working in a group for such a big project
 - I learned how to coorprate with other people.
 - In general good. But it dependes on the project leader. If the project leader is not good, then whole thing might get worst.
 - interesting to work with guys from different country. learn many things from the person with different background
 - it is good
 - It is quite interesting but tasks were not that well define in my groupd and some people works more than the other
 - It was a great experience, learning from people with differnt backgrounds and area of expertise
 - good
-

19. When did you here about the course ? Why did you chose it?

- Course paln
- While subscribing to the courses, I chose it because I thought it will be a good experience to apply the theory.
- I heard it last semester and I think it is interesting
- it is mandatory course for our master program.

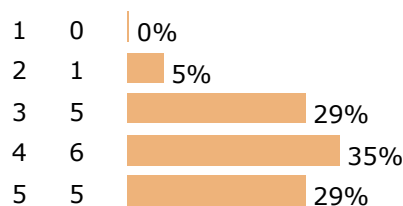

- On webpage of wireless systems. Because it is
 - On the KTH website. I chose it because it seems interesting to finish my master studies by a real application project.
 - beginning of the academic year (september 2010)
 - I got it from the Wireless Program website.
 - From student that worked last year. I wanted to do something practical.
 - half a year before, it is interesting and useful. and can learn many things beyond textbook
 - it is a good chance for practice my theory knowledge
 - I heard
 - Aug 2010... and chose it in November 2010
 - aug. 2011 nov.
-

20. Do you think smart-phones are a good platform for student projects?

- yes
 - Yes
 - Yes, because it is very convenient to use
 - Sure
 - Yes
 - Very good. It enables us to have something very user-friendly. It makes someone proud when it works on a real smartphone
 - Yes, it is really nice to link the projects to something topical
 - Yes. It's fashionable.
 - yes
 - quite agree
 - yes
 - It's perfect to be in our time
 - yes
 - yes, but student background on JAVA should be taken into account
 - yes
-

21. Reflective diaries is a good indicator of student learning.

17 svarande

- Some people are not good at expressing while some people write a lot about it (2)
 - people not working can also write diary. This is unfair for working people (3)
 - It is not cover all learning parts. I learnt also about how to deal with a problem and cases like this, which I didn't mention in my diaries. (3)
 - I don't really know. I wish I could read other's diaries to see if it reflects how I saw things. (3)
 - Not really. People who has't done much can also write a lot on the diary. (3)
 - n/a (3)
 - It is a bit painful to do each week. But at the end it is reusable for the report and it gives a good expression of the work and understanding of everybody. (4)
 - May not be enough to judge by that only. May be it is good to have meeting at last to distinguish the one who really worked much. (4)
-

22. Any other comments

- Again I think it is better to set a unique topic for each group

- *The course is generally very good.*
 - *I had good time. Loved the project. I want thanks Per and my assistance for their help.*
 - *n/a*
 - *Very good course but don't take other course because it takes a lot of time.*
 - *no*
 - *Regular feedback and guidance is required*
 - *we need more guidance*
-
