

AB1002 Introduction to Civil Engineering and Urban Management 1.5 credits

Introduktion till samhällsbyggnad

This is a translation of the Swedish, legally binding, course syllabus.

If the course is discontinued, students may request to be examined during the following two academic years

Establishment

Course syllabus for AB1002 valid from Autumn 2007

Grading scale

P, F

Education cycle

First cycle

Main field of study

Built Environment, Technology

Specific prerequisites

Students accepted to the Civil Engineering and Urban Management program, CSAMH. Kan ej läsas av andra studenter.

Language of instruction

The language of instruction is specified in the course offering information in the course catalogue.

Intended learning outcomes

To repeat some high school mathematics and to give an introduction to studies at KTH and the Civil Engineering and Urban Management Program.

Course contents

- Introduction to the program: short presentation of the entire program, the common part and the specializations. Presentation of the teachers and detailed descriptions of the courses in the first year.
- Mathematics repetition: repetition primary of the high school mathematic courses A, B and C.
- Study-techniques and report-writing.
- Introduction to computer-systems and information-seeking.
- Study trip: Visit to building-projects in the Stockholm area.

Examination

- NÄR1 - Attendance, 1.5 credits, grading scale: P, F

Based on recommendation from KTH's coordinator for disabilities, the examiner will decide how to adapt an examination for students with documented disability.

The examiner may apply another examination format when re-examining individual students.

Compulsory attendance in all five parts.

Other requirements for final grade

80% attendance.

Ethical approach

- All members of a group are responsible for the group's work.
- In any assessment, every student shall honestly disclose any help received and sources used.
- In an oral assessment, every student shall be able to present and answer questions about the entire assignment and solution.
