Course contents

Functional requirements for buildings. Planning. Architectural gestaltung, Foundations and structure. The choice and analysis of structural elements. Selection of materials: Technology, environment, durability, aesthetics, economy. Building components: Foundation, floors, walls, sanitary, electricity. Sources of information for building materials and building services equipment, codes and test methods, grades of quality. Revision, documents, cost calculations.

Examination

- PRO1 - Project, 9.0 credits, grading scale: A, B, C, D, E, FX, F
- ÖVN1 - Exercises, 6.0 credits, grading scale: P, F

Based on recommendation from KTH's coordinator for disabilities, the examiner will decide how to adapt an examination for students with documented disability.

The examiner may apply another examination format when re-examining individual students.

If the course is discontinued, students may request to be examined during the following two academic years.

Exercises (ÖVN1; 6 cr)
Project (PRO1; 9 cr)

Ethical approach

- All members of a group are responsible for the group's work.

- In any assessment, every student shall honestly disclose any help received and sources used.
- In an oral assessment, every student shall be able to present and answer questions about the entire assignment and solution.
