

AF2025 Architectural Engineering Project 7.5 credits

Projekt för huskonstruktörer

This is a translation of the Swedish, legally binding, course syllabus.

Establishment

Course syllabus for AF2025 valid from Autumn 2011

Grading scale

A, B, C, D, E, FX, F

Education cycle

Second cycle

Main field of study

The Built Environment

Specific prerequisites

Bachelor exam "Samhällsbyggnad" or equivalent, for example "högskoleingenjör" in the field of house construction.

Language of instruction

The language of instruction is specified in the course offering information in the course catalogue.

Intended learning outcomes

After the course is completed the student should have a fundamental understanding of the technical functions of building components and of the building as a system. Furthermore the student should have some skills in the various fields involved in the design of a building and an insight into the role of the different professions.

Course contents

Functional requirements for buildings. Architectural design. Foundation and structure. Selection of materials: Technology, environment, durability, aesthetics, economy. Building components and detailing, heat and moisture. Building services, heating, ventilation and sanitary. Revision, documents.

Disposition

The course will be given as lectures, workshops, exercises, seminars and a project task.

Course literature

To be presented at the start of the course

Examination

- ÖVN1 - Exercises, 2.5 credits, grading scale: P, F
- PRO1 - Project Assignment, 5.0 credits, grading scale: A, B, C, D, E, FX, F

Based on recommendation from KTH's coordinator for disabilities, the examiner will decide how to adapt an examination for students with documented disability.

The examiner may apply another examination format when re-examining individual students.

If the course is discontinued, students may request to be examined during the following two academic years.
