

AF2025 Architectural Engineering Project 7.5 credits

Projekt för huskonstruktörer

This is a translation of the Swedish, legally binding, course syllabus.

If the course is discontinued, students may request to be examined during the following two academic years

Establishment

Course syllabus for AF2025 valid from Autumn 2018

Grading scale

A, B, C, D, E, FX, F

Education cycle

Second cycle

Main field of study

Built Environment

Language of instruction

The language of instruction is specified in the course offering information in the course catalogue.

Intended learning outcomes

After the course student should be able to:

- To make a project proposal, for a building, that takes into account the different aspects of sustainability
- Select technical solutions and illustrate those solutions with technical drawings
- Reflect on the choice of technical solutions in terms of the risk of moisture damages
- Describe some of the most relevant factors related to energy use of buildings
- Discuss the influence of different parameters on energy use
- Discuss the influence of different parameters on Global Warming potential and Embodied Energy
- Reflect on different aspects of sustainability related to a building project

Course contents

Functional requirements for buildings. Architectural design, Foundations and structure. Selection of materials: Technology, environment, durability, aesthetics, economy. Building components and detailing. Sustainability, environmental aspects and energy use. Building information models.

Disposition

The course will be given as lectures, workshops, exercises, seminars and a project task.

Specific prerequisites

AF2003 Structural Engineering, Advanced Course or equivalent course

Course literature

Relevant literature to be able to carry out the project work.

Examination

- PRO1 - Project Assignment, 5.0 credits, grading scale: A, B, C, D, E, FX, F
- ÖVN1 - Exercises, 2.5 credits, grading scale: P, F

Based on recommendation from KTH's coordinator for disabilities, the examiner will decide how to adapt an examination for students with documented disability.

The examiner may apply another examination format when re-examining individual students.

Project and exercises

Other requirements for final grade

Passed Project Assignment

Passed Exercises

Ethical approach

- All members of a group are responsible for the group's work.
- In any assessment, every student shall honestly disclose any help received and sources used.
- In an oral assessment, every student shall be able to present and answer questions about the entire assignment and solution.
