If the course is discontinued, students may request to be examined during the following two academic years

Establishment

Course syllabus for AG2119 valid from Autumn 2011

Grading scale

A, B, C, D, E, FX, F

Education cycle

Second cycle

Main field of study

Built Environment

Language of instruction

The language of instruction is specified in the course offering information in the course catalogue.

Intended learning outcomes

The aim of the course to provide a deeper understanding of contemporary planning practice and research in Sweden and elsewhere, with special focus on problem analysis, methodological approach and inductive reasoning. After completing the course, students shall be able to:

- evaluate and critically analyse planning practice and research in Sweden, Europe and elsewhere
- identify research needs and transform them into a research project
- select a relevant research methodology that suit the anticipated result

Course contents

In the course planning practise in different countries is analysed in a comparative context. The course consists of lectures on contemporary planning studies from different parts of the world. Furthermore, the course consists of seminars in which results from empirical research will be discussed and analysed. In addition, various quantitative and qualitative methods for planning research will be addressed as tools for the assessment of urban and rural settlements patterns, analysis of planning practice, understanding of mechanisms for societal change and identification of future developments and needs. As part of the course students have to prepare a project description for his/her Master's project and present it.

Disposition

Seminars 20h, time for assignments

Specific prerequisites

A Bachelor's degree in architecture or landscape architecture, civil engineering in the built environment or equivalent, urban and regional planning or social sciences including courses corresponding to a minimum of 30 ECTS credits in the field of urban, transport or regional planning and economics, geoinformatics or environmental sciences.
