

AG2143 Sustainable Rural and Urban Development 7.5 credits

Sustainable Rural and Urban Development

This is a translation of the Swedish, legally binding, course syllabus.

If the course is discontinued, students may request to be examined during the following two academic years

Establishment

Course syllabus for AG2143 valid from Autumn 2007

Grading scale

A, B, C, D, E, FX, F

Education cycle

Second cycle

Main field of study

Built Environment

Specific prerequisites

Completed undergraduate academic degree or three years of study in engineering, architecture, surveying, geography, economics, business administration, sociology or planning.

Language of instruction

The language of instruction is specified in the course offering information in the course catalogue.

Intended learning outcomes

Provide the students with both knowledge on, and opportunity to contribute in the field of sustainable rural and urban development

Course contents

The course provides an integrated approach of theoretical and practical knowledge on sustainable development on various levels of influence with a special focus on rural and urban areas. The course starts with a review of basic concepts, ideologies, approaches and conventions as well as agencies in relation to sustainability issues from global perspective. This is followed with a critical analysis of the development strategies and policies applied in developed and developing countries, highlighting their potentials as well as shortcomings. The second step concerns focused discussion on various concepts, policies and strategies related to sustainable rural and urban development on both national and local levels as well as the interrelations and synergies between both development areas.

A project **for change** is introduced as a central pedagogic tool to discuss both vertical and horizontal links engaged in global development and how such strategies are interpreted into actions in local contexts, where the situational settings vary in line with socio-economic, political and environmental conditions as well as availability of natural resources and financial requirements.

Disposition

24h seminars, 8h excursion
