

AG2800 Livscykelanalys 7,5 hp

Life Cycle Assessment

När kurs inte längre ges har student möjlighet att examineras under ytterligare två läsår.

Fastställande

Kursplan för AG2800 gäller från och med VT09

Betygsskala

A, B, C, D, E, FX, F

Utbildningsnivå

Avancerad nivå

Huvudområden

Miljöteknik, Samhällsbyggnad

Särskild behörighet

Eligibility for single course students not attending a KTH programme:

- completed and documented upper secondary education including documented proficiency in English for English spoken courses, and
- documented academic records corresponding to 180 hp in Engineering, Natural sciences including 15 hp in Environmental Science or equivalent.

Undervisningsspråk

Undervisningsspråk anges i kurstillfällesinformationen i kurs- och programkatalogen.

Lärandemål

The overall aim of this course is to develop your skills of systems thinking in environmental issues, related to your own area of expertise. This course will give you a basic analyst's competence in Life Cycle Assessment (LCA). After completing the course, you should be able to:

- Explain the overall purpose and principles of LCA.
- Discuss possible applications and limitations of LCA.-Describe the content and explain the purpose of the analytical steps of LCA.
- Carry out a complete LCA of a product or service system, including:
 1. identify and delimit the system,
 2. specify and handle allocation problems,
 3. identify and use relevant data from LCA databases,
 4. collect and use data from other sources,
 5. choose characterisation method based on coverage and relevance to the intended application,
 6. implement and use a computer model of the system in the LCA software SimaPro,
 7. analyse, explain, and interpret model results.
- Write a report of the performed LCA, applying to the reporting guidelines and terminology as defined in the ISO standard for LCA.
- Make a critical review of another LCA.

Kursinnehåll

The course includes lectures and a group project. Lectures will cover the following areas:

- LCA in relation to other environmental systems analysis tools. •Methodology for the different phases of an LCA (goal definition and scoping, inventory analysis, impact assessment and interpretation).
- Methodology for simplified LCA.
- LCA software tools and databases.
- Critical review of an LCA study.
- Application areas of LCA and limitations.

Kursupplägg

The course includes lectures and a group project. Groups of 2-4 students will perform projects in which an LCA is performed with the software SimaPro. Projects are presented in a report and at a seminar. Each group will also make a critical review of the LCA of another group.

Kurslitteratur

Baumann, H, and Tillman, A.-M. (2004): The Hitch Hiker's Guide to LCA. Studentlitteratur. Recent scientific papers will be handed out at the start of the course.

Examination

- PRO1 - Critical Review, 1,0 hp, betygsskala: P, F
- PRO2 - Project report, 4,0 hp, betygsskala: A, B, C, D, E, FX, F
- TEN1 - Tentamen, 2,5 hp, betygsskala: A, B, C, D, E, FX, F

Examinator beslutar, baserat på rekommendation från KTH:s handläggare av stöd till studenter med funktionsnedsättning, om eventuell anpassad examination för studenter med dokumenterad, varaktig funktionsnedsättning.

Examinator får medge annan examinationsform vid omexamination av enstaka studenter.

Övriga krav för slutbetyg

Examination (TEN1; 2,5 hp), Critical review (PRO1; 1,0 hp), Project report (PRO2; 4,0 hp). Final grade is a weighted average of the written exam and the project report. "Pass" grade on the critical review is required to receive a final grade.

Etiskt förhållningssätt

- Vid grupparbete har alla i gruppen ansvar för gruppens arbete.
- Vid examination ska varje student ärligt redovisa hjälp som erhållits och källor som använts.
- Vid muntlig examination ska varje student kunna redogöra för hela uppgiften och hela lösningen.
