

AG2927 Geodata Quality and Adjustment Theory 7.5 credits

Geodatakvalitet och felteori

This is a translation of the Swedish, legally binding, course syllabus.

If the course is discontinued, students may request to be examined during the following two academic years

Establishment

Course syllabus for AG2927 valid from Autumn 2021

Grading scale

A, B, C, D, E, FX, F

Education cycle

Second cycle

Main field of study

Built Environment

Specific prerequisites

A completed bachelor's degree in civil engineering, urban planning, geomatics, geography, engineering physics, computer science, statistics, economics, and/or mathematics

Documented knowledge in Geodetic Surveyin corresponding to the content in cours AG1818 together with Eng B/6 according to the Swedish upper secondary school system.

Language of instruction

The language of instruction is specified in the course offering information in the course catalogue.

Intended learning outcomes

After the course, the student should

- understand different quality aspects of geodata and its importance for GIS-applications
- be able to evaluate geodatabases and design appropriate measures for quality assurance actions
- be familiar with measurement error and computation of error propagation
- be able to apply the least squares method to adjust measurement data

Course contents

- Different quality aspects in geodata
- Quality assurance actions
- Quality of measurement data: precision, precision and reliability
- Measurement error and the law of error propagation
- Error ellipse and error ellipsoid
- The least-squares method
- Condition adjustment
- Adjustment elements
- Generalised matrix inverses and free network adjustment
- Gross error detection, local redundancy and reliability

Examination

- TEN1 - Examination, 4.5 credits, grading scale: A, B, C, D, E, FX, F
- ÖVN1 - Exercise, 3.0 credits, grading scale: P, F

Based on recommendation from KTH's coordinator for disabilities, the examiner will decide how to adapt an examination for students with documented disability.

The examiner may apply another examination format when re-examining individual students.

Other requirements for final grade

Passed written examination (TEN1), 4.5 cr

Passed laboratory reports (ÖVN1), 3.0 cr

Ethical approach

- All members of a group are responsible for the group's work.
- In any assessment, every student shall honestly disclose any help received and sources used.
- In an oral assessment, every student shall be able to present and answer questions about the entire assignment and solution.
