

# AH1024 Traffic Management and Operation 7.5 credits

Styrning av trafiksystem

This is a translation of the Swedish, legally binding, course syllabus.

## Establishment

## Grading scale

A, B, C, D, E, FX, F

## Education cycle

First cycle

## Main field of study

Technology

## Specific prerequisites

AH1021 Urban and traffic planning or equivalent.

## Language of instruction

The language of instruction is specified in the course offering information in the course catalogue.

## Intended learning outcomes

The course provides a basic understanding of the general principles for design, management and control of operation of transport systems. It emphasizes general principles and methods which are applicable to all modes of transport, passenger and freight, urban and intercity. The course will also introduce tools for evaluating alternative designs for transport system operations.

## Course contents

- General principles for transport systems operations
- Components of transport systems
- Development of operations plans
- System operations and management
- Case studies focusing on the development and evaluation of alternative transports systems and services.

## Course literature

- Kompendium om Kollektivtrafik i städer
- Kursmaterial från Tågtrafikgruppen.
- Artiklar som delas ut / läggs på Bilda under kursen.
- Vägar och gators utformning (VGU). Vägverket 2004.
