

AH213X Degree Project in Logistics, Second Cycle 30.0 credits

Examensarbete inom logistik, avancerad nivå

This is a translation of the Swedish, legally binding, course syllabus.

Establishment

Course syllabus for AH213X valid from Autumn 2007

Grading scale

A, B, C, D, E, FX, F

Education cycle

Second cycle

Main field of study

Industrial Management

Specific prerequisites

The thesis work is part of a deepening knowledge in the subject logistics according to KTH:s examination requirements. Therefore normally it is required that the student has studied the courses AH2102 Logistics and Logistics, advanced course, or similar.

Language of instruction

The language of instruction is specified in the course offering information in the course catalogue.

Intended learning outcomes

As pointed out in the Logistics courses the goal is to reach beyond facts and descriptions and to reach conclusions based on synthesis and analysis.

Course contents

The Master thesis includes at least information search, literature analysis, theoretical description and methodology as well as analysis of the results.

The time required is based on 20-study weeks full time.

The student describes suggestions for thesis work, by industry or by a teacher. The suggestion includes a background and a short description (about one A4-page).

Together with the teacher the student makes a project plan and a preliminary aim and nature of the work. After the teacher accepts this plan the student is registered.

The thesis work will result in a report based on a scientific work process. The manuscript is presented at a seminar. The examiner decides if corrections are necessary and after these are made no further seminar is necessary.

Examination

- XUPP - Examination Question, 30.0 credits, grading scale: A, B, C, D, E, FX, F

Based on recommendation from KTH's coordinator for disabilities, the examiner will decide how to adapt an examination for students with documented disability.

The examiner may apply another examination format when re-examining individual students.

If the course is discontinued, students may request to be examined during the following two academic years.

Other requirements for final grade

To be accepted as a thesis work the following is required. Project Plan, final report, oral presentation of the work and acting as opponent at another student thesis seminar (or another specified seminar).

Ethical approach

- All members of a group are responsible for the group's work.
- In any assessment, every student shall honestly disclose any help received and sources used.

- In an oral assessment, every student shall be able to present and answer questions about the entire assignment and solution.
