Physics A and Chemistry A. Physics A and Chemistry A can be replaced by Natural Science B.

Language of instruction

The language of instruction is specified in the course offering information in the course catalogue.

Intended learning outcomes

The students should after the course be able to:

- Explain the function, financing and management of the real estate market.
- Explain the content of the Land Code and the Real Property Formation Act.
- Explain the content of the Estate Agents Act and the different parts of the process of mediating property.
- Explain how different actors perceive development of cities and society and the different tradeoffs that they are considering.
- Find and use different sources of information for the written assignment.
- Write a well-structured and informative essay and orally present the results.

Course contents

The aim of the course is to give the student a basic understanding of how real estate agents and real estate developers work in order to meet the sellers, customers and authorities demands on impartiality during the process of mediating property. The course includes, inter alia, the question how the work to increase the value of real property is affected by the Estate Agents Act, the Real Property Formation Act and other central legislation. The course is intended to give an broad introduction to the subject area as an introduction to the program Property Development and Agency. Law, marketing, financing and ethics are central parts of the mediating process and thus of the course.

Course literature

Course compendium containing journal papers, reports and book excerpts will be provided to the students via BILDA.

Examination

- TEN1 - Examination, 4.0 credits, grading scale: A, B, C, D, E, FX, F
- ÖVN1 - Assignment, 2.0 credits, grading scale: P, F

Based on recommendation from KTH's coordinator for disabilities, the examiner will decide how to adapt an examination for students with documented disability.

The examiner may apply another examination format when re-examining individual students.

Ethical approach

- All members of a group are responsible for the group's work.
- In any assessment, every student shall honestly disclose any help received and sources used.
- In an oral assessment, every student shall be able to present and answer questions about the entire assignment and solution.
