Main field of study

Technology

Language of instruction

The language of instruction is specified in the course offering information in the course catalogue.

Intended learning outcomes

The overall purpose of the course is to provide knowledge about the legal regulation of real property, its division into real property units, dispositions concerning real property units and rights in real property units, so that the student is able to apply the knowledge when solving practical legal problems connected to the area of built environment. The legislation concerning real property and the balancing of interests that is to be made between different actors that are included in this regulation give rise to both economic and ethical issues. From a social perspective, issues concerning the environment and sustainability also arise.

After having taken the course the student shall be able to:

- 1) explain the structure and central concepts in the real-estate law regulatory system, the main issues that are regulated and how the regulation is constituted in more detail,
- 2) by means of the legal method apply legal rules on practical real-life issues,
- 3) justify the choice of and applicability of the legal rules on the assigned practical real-life issues

Course contents

The course begins with an introduction to the legal system and the legal method and its application in a real estate context. Thereafter, the focus is on civil-law rules on property and rights in real estate, which are mainly found in the Land Code.. First, this part covers what real property is, how it is divided into property units and fixtures. Thereafter, it covers the transfer of real estate, primarily property purchases. Mortgages of real estate and the legal effects of mortgages are treated as well as forced sales of real estate. Furthermore, the law on user rights, especially rent and leasehold, and easements are dealt with. Also, the law of property rights and title registration are covered.

Specific prerequisites

Examination

- NÄR1 - Attendance, - credits, grading scale: P, F
- TENA - Examination, 6.0 credits, grading scale: A, B, C, D, E, FX, F
