If the course is discontinued, students may request to be examined during the following two academic years

Establishment

Course syllabus for AI151X valid from Spring 2020

Grading scale

P, F

Education cycle

First cycle

Main field of study

Technology

Specific prerequisites

At least 120 credits should be completed in the education, before the degree project may be started of which 60 credits with progressive specialisation for first-cycle studies within the main field of study including in-depth courses for the specialisation the student has chosen. Examiner decides and controls that the student has the specialisation that is required and

that the student has completed the main part of the studies before the degree project is started. Exemption can after assessment be granted by coordinator of first-cycle courses and study programmes

Language of instruction

The language of instruction is specified in the course offering information in the course catalogue.

Intended learning outcomes

After completed degree project, the student should be able to

show knowledge of the disciplinary foundation of the chosen subject area, applicable methods and orientation in current research and development and show advanced knowledge within some part of the subject area

demonstrate the ability to search, collect and use relevant information critically and identify one's needs of additional knowledge

demonstrate the ability to formulate, assess and handle problems and critically discuss phenomena, issues and situations

demonstrate the ability to plan and with applicable methods carry out assignments within given time frames

demonstrate the ability to orally and in writing in dialogue with different groups account for and discuss information, problems and solutions

demonstrate the ability to make assessments considering relevant scientific, social and ethical aspects

show such skills that is required to work independently within some part of the main study field of technology

demonstrate an understanding of the meaning of a sustainable development within the subject area

Course contents

The degree project should constitute a specialised study in the main field for first-cycle studies to satisfy the requirements for higher education qualification. The course is designed as a limited project of independent nature within the field of real estate economics and/or land law.

Examination

- XUPP - Degree Projekt, 15.0 credits, grading scale: P, F

Based on recommendation from KTH's coordinator for disabilities, the examiner will decide how to adapt an examination for students with documented disability.

The examiner may apply another examination format when re-examining individual students.

The degree project should normally be carried out under the program's last semester. For accepted degree project, the achievement may not be failed according to one of the expected learning outcomes of the course.

Other requirements for final grade

Accepted examination assignment that is presented at a seminar.

Ethical approach

- All members of a group are responsible for the group's work.
- In any assessment, every student shall honestly disclose any help received and sources used.
- In an oral assessment, every student shall be able to present and answer questions about the entire assignment and solution.
