Intended learning outcomes

The course should enable you to develop skills in methods for market analysis and development of housing by:- Identifying the criteria for determining the appropriate level of a market analysis.-Being able to determine if a site meets physical, regulatory and environmental requirements - the productivity analysis of the project- Examining the various theories or models of urban growth and how they relate to real estate market analysis- Recognizing macro determinants and equilibrium, cyclical patterns in the real estate market and the relationship between the national business cycle and the local real estate cycle.- Being able to delineate a market area, as well as to identify and collect the market data needed to evaluate supply, demand and then quantify the gap- Analyzing the financial feasibility of the development measuring cash flows, costs, loans, profits, etc. Through case studies, the course should also enable you to identify stakeholders of real estate projects; developer, clients, local government, tax payers, special interest groups, etc. and each points view.

Course contents

Real Estate Market analysis and development is an applied course in market analysis of housing and real estate markets from an international perspective, with special emphasis on the US and Swedish experiences. The aim of the course is to give you knowledge of theories behind the methods of market analysis used by real estate firms. The course will also help you to develop skills in methods for markets analysis. This course in market analysis and development will prepare you for work in the real estate field, within developers consultancy firms, institutional investors and building companies.
