Intended learning outcomes

After completing this course, the student should be able to

1. show knowledge of the theory of international project management
2. demonstrate the ability to search, collect and use relevant information critically and identify any need of additional knowledge
3. demonstrate the ability to formulate, assess and handle problems and critically discuss phenomena, issues and situations relevant for international project management
4. demonstrate the ability to plan and with applicable methods carry out project tasks, within given time frames
5. demonstrate the ability to orally and in writing, account for and discuss information, problem and solutions in dialogue with project stakeholders
6. demonstrate the ability to analyze the course content from an ethical and sustainability perspective

Course contents

The course consists of lectures, seminars, project work.

It focuses on international project management theory, international project management practice, and the application of theory and practice in the implementation of an international project.

Examination

- PROA - Project, 15.0 credits, grading scale: A, B, C, D, E, FX, F

Based on recommendation from KTH's coordinator for disabilities, the examiner will decide how to adapt an examination for students with documented disability.

The examiner may apply another examination format when re-examining individual students.

If the course is discontinued, students may request to be examined during the following two academic years.

Ethical approach

- All members of a group are responsible for the group's work.
- In any assessment, every student shall honestly disclose any help received and sources used.
- In an oral assessment, every student shall be able to present and answer questions about the entire assignment and solution.
