

AI2162 Internship Continuous Assessment 12.0 credits

Entreprenörskurs II - Erfarenhetsdokumentation

This is a translation of the Swedish, legally binding, course syllabus.

Establishment

The official course syllabus is valid from the autumn semester 2026 as decided by the Faculty Board: HS-2026-0993. Decision date: 2026-06-11

Grading scale

A, B, C, D, E, FX, F

Education cycle

Second cycle

Main field of study

The Built Environment

Specific prerequisites

Only students who have been selected for studies in KTH's entrepreneurship program for exchange students may qualify. These students must have attained at least 120 credits.

Intended learning outcomes

After completing the course, the student should be able to:

Knowledge and understanding

- Describe the knowledge that is necessary in documenting the internship work experience, lessons learned and new ideas and insights generated.
- Describe the knowledge gained through the internship work experience, lessons learned and new ideas and insights generated.
- Explain the role of the internship process and knowledge gained, as a contributor to sustainable development.

*Skill and ability *

- Document their work experience, lessons learned and new ideas and insights generated.
- Provide written and oral reports of the internship training.

Judgment and approach

- Based on the experiences gained, determine strengths and areas for development within the professional practice based on ethical and responsible behaviour.

Course contents

This 12-credit module forms an integral part of the structured learning in entrepreneurship at KTH. The program provides an opportunity for undergraduate students to immerse in Stockholm's entrepreneurial environment by undergoing a 1-year internship at a technology-based company.

The module measures the student's overall performance in the program (both on and outside the internship) over the 1-year duration.

Throughout the program period, students will document their internship work experience, lessons learned and new ideas and insights generated in the course of their internship in a logbook. The logbook will serve as a useful basis for regular interactions and discussions with their assigned consulting professors. Consulting professors will meet with the students and their host company representatives at least once every 3 months to

- review the student's performance to-date;
- provide feedback to students to further improve their performance; and
- review internship training objectives and revise/fine-tune goals and directions where necessary.

Examination

- PRO1 - Project assignment, 12.0 credits, grading scale: A, B, C, D, E, FX, F

Based on recommendation from KTH's coordinator for disabilities, the examiner will decide how to adapt an examination for students with documented disability. The examiner may apply another examination format when re-examining individual students. If the course is discontinued, students may request to be examined during the following two academic years.

Ethical approach

- All members of a group are responsible for the group's work.
- In any assessment, every student shall honestly disclose any help received and sources used.
- In an oral assessment, every student shall be able to present and answer questions about the entire assignment and solution.
