Built Environment

Language of instruction

The language of instruction is specified in the course offering information in the course catalogue.

Intended learning outcomes

The aim of the course is to cover central economic questions relevant for real estate management in the public sector, based on theories from 'Business Administration and Economics.

After the course the students should be able to make a property management plan, simpler investment calculations and be aware of advantages and disadvantages when choosing between outsourcing or inhouse management, owning vs leasing space and different designs of an internal asset rent system.

Course contents

- Property management plans, maintenance planning
- Investment analysis, rent calculations and calculation of life-cycle cost
- Outsourcing vs inhouse production
- Owning vs leasing
- Design of internal asset rent systems
- Strategies for increasing energy efficiency

Course literature

- Fastighetsföretagande i offentlig sektor – Strategiska frågor och den samlade kunskapen av HansLind, Stellan Lundström
