Grading scale

P, F

Education cycle

Second cycle

Main field of study

Built Environment

Language of instruction

The language of instruction is specified in the course offering information in the course catalogue.

Intended learning outcomes

After the course the participants shall:

- be able to present the main features of the opportunities / limitations law gives municipalities to regulate building development location and design.
- be able to clarify the responsibilities of the developer and the municipality for the construction, operation and financing of roads, parks, sewage systems, etc.
- know the tools of compulsory land acquisition in order to adaptat existing property division to the new land use
- know the legal limits of so-called development agreements between a municipality and a developer

Course contents

The course consists of two parts, 3 + 1 days:

The first part focuses on lectures and discussions on

- the Planning and Building Act, opportunities and constraints for building regulations i detailed plans and building permits
- the legislation for construction, operation and financing of the infrastructure necessary for, primarily, residential building projects.
- the legislation on compulsory acquisition, incl. compensation rules
- rules for regulation by development agreements and municipal land allocation agreements.

The second part emphasis is on presentation of the project-work and discussions on how the legislation is the base for negotiations between the developer and the municipality

Examination

- INL1 - Assignment, 6.0 credits, grading scale: P, F
