

# AI281X Degree Project in Architectural Design and Construction Project Management, Second Cycle 30.0 credits

Examensarbete inom Byggprojektledning, avancerad nivå

This is a translation of the Swedish, legally binding, course syllabus.

## Establishment

Course syllabus for AI281X valid from Autumn 2019

## Grading scale

P, F

## Education cycle

Second cycle

## Main field of study

The Built Environment

## Specific prerequisites

A main part of studies, at least 60 credits, should be completed, of which 30 credits of specialisation at an advanced level within the main field of study, together with the course in theory of Science and Research Methods before the degree project may be started.

It is the examiner's responsibility to make sure that the eligibility is verified.

## Language of instruction

The language of instruction is specified in the course offering information in the course catalogue.

## Intended learning outcomes

After completed degree project, the student should be able to:

1. demonstrate knowledge and understanding of the scientific foundation and best practices for the chosen subject, as well as an advanced understanding in current research and development within the area, and in-depth knowledge of research methodology.
2. demonstrate the ability search, creation and integration of knowledge and to identify if there is a need for additional knowledge, all with a holistic, critical and systematic work approach.
3. demonstrate the ability to identify, analyse, assess and handle complex phenomena, issues and situations also with limited information
4. demonstrate the ability to plan and with adequate methods carry out qualified assignments within given time frames and to evaluate this work
5. demonstrate the ability to develop and evaluate products, processes, systems, methods or technical solutions with respect to human's circumstances and needs as well as society's goals in term of economically, socially and ecologically sustainable development.
6. demonstrate the ability, both orally and in writing, in dialogue with different groups, to clearly account for and discuss the conclusions and the knowledge and arguments on which these are based
7. demonstrate the ability to make assessments considering relevant scientific, social and ethical aspects
8. show such skills that is required to participate in research and development or to work independently in other qualified activities

## Course contents

The degree project should constitute a part of the specialisation within the main field of study samh llsbyggnad at second cycle level to satisfy the requirements for degree.

It implies that the degree project normally should be carried out within construction project management.

## Disposition

The course is designed as a limited research project.

The course design can include literature studies, problem formulation, collection and compilation of data and analysis.

The degree project should be presented at a seminar. The degree project should be written and presented in Swedish or English. A summary should be included in both languages. The Master thesis will be checked for plagiarism.

## Course literature

Relevant literature to be able to carry out the degree project.

## Examination

- XUPP - Degree Project, 30.0 credits, grading scale: P, F

Based on recommendation from KTH's coordinator for disabilities, the examiner will decide how to adapt an examination for students with documented disability.

The examiner may apply another examination format when re-examining individual students.

If the course is discontinued, students may request to be examined during the following two academic years.

The degree project should normally be carried out under the program's last semester. To pass the degree project must the achievement not be below any of the expected learning outcomes of the course.

## Other requirements for final grade

Passed degree project report that has been presented at a seminar.

## Ethical approach

- All members of a group are responsible for the group's work.
- In any assessment, every student shall honestly disclose any help received and sources used.
- In an oral assessment, every student shall be able to present and answer questions about the entire assignment and solution.
