

AK2030 Theory and Methodology of Science (Natural and Technological Science) 4.5 credits

Vetenskapsteori och vetenskaplig metodik (naturvetenskap)

This is a translation of the Swedish, legally binding, course syllabus.

If the course is discontinued, students may request to be examined during the following two academic years

Establishment

Course syllabus for AK2030 valid from Spring 2011

Grading scale

A, B, C, D, E, FX, F

Education cycle

Second cycle

Main field of study

Specific prerequisites

120 ECTS credits university studies. Proficiency in English corresponding to English B in Swedish **gymnasium**.

Language of instruction

The language of instruction is specified in the course offering information in the course catalogue.

Intended learning outcomes

After completed course the student should be able to

- account for and apply fundamental concepts from the theory and methodology of science on problem areas within the theory and methodology of science,
- account for fundamental theories concerning the epistemological and explanatory status of science,
- identify and critically discuss, both orally and in writing, fundamental theoretical and methodological issues in the technical, natural and social sciences,
- identify and critically discuss, both orally and in writing, specific methodological problems in a study, the design of an experiment, the use of a particular method of measurement, or the use of a particular model,
- analyze the relationship between the basic results of a study and the conclusions that legitimately can be drawn on the basis of the results.

Course contents

The following is an incomplete list of topics covered in the course.

- Scientific knowledge
- Hypothesis testing
- Causes and correlations
- Observations and measurements
- Experiments
- Models
- Law and explanations
- The development of science
- Research ethics
- Scientific papers and peer review

Disposition

Lectures and seminars.

Course literature

- Sven Ove Hansson "The art of being scientific"
- Information on additional literature will be given on the course webpage no later than four weeks before the course start.

Examination

- SEM1 - Seminars, 1.5 credits, grading scale: P, F
- TENA - Examination, 3.0 credits, grading scale: A, B, C, D, E, FX, F

Based on recommendation from KTH's coordinator for disabilities, the examiner will decide how to adapt an examination for students with documented disability.

The examiner may apply another examination format when re-examining individual students.

Other requirements for final grade

Fulfilled seminar requirements and written exam.

Ethical approach

- All members of a group are responsible for the group's work.
- In any assessment, every student shall honestly disclose any help received and sources used.
- In an oral assessment, every student shall be able to present and answer questions about the entire assignment and solution.
