BB1080 Biochemistry, Theory 7.5 credits

Biokemi, teori

This is a translation of the Swedish, legally binding, course syllabus.

If the course is discontinued, students may request to be examined during the following two academic years

Establishment

Course syllabus for BB1080 valid from Spring 2009

Grading scale

A, B, C, D, E, FX, F

Education cycle

First cycle

Main field of study

Biotechnology,Technology

Specific prerequisites

Language of instruction

The language of instruction is specified in the course offering information in the course catalogue.

Intended learning outcomes

The course is designed to provide a basic knowledge of the cell's macro molecules and the cellular processes on a molecular level and give an introduction to biochemical analysis and separation methods.

After passing the course, the student should be able to:

- describe and summarize the cell's basic biochemical processes on a molecular level and solve more simple problems
- describe the connection between catabolism and anabolism
- expand his/her understanding within biochemical, bio-process technical, molecular biological and enzymological areas.

Course contents

Biochemical analysis and separation methods.

Enzymology (catalysm, kinetics, mechanisms, inhibition).

Protein structure, function and biosynthesis.

Glycolysis, gluconeogensis and the citric acid cycle.

Glycogen, lipids and nitrogen metabolism.

The calvin cycle and the pentose phosphate pathway.

Metabolic rule mechanisms.

G-Proteins.

Hormone control and signal transference.

Biological membranes and transport processes over membranes.

Oxidative phosphorylation and photosynthesis.

Examination

- TEN1 - Examination, 7.5 credits, grading scale: A, B, C, D, E, FX, F

Based on recommendation from KTH's coordinator for disabilities, the examiner will decide how to adapt an examination for students with documented disability.

The examiner may apply another examination format when re-examining individual students.

Other requirements for final grade

A written exam (TEN1; 7,5 credits, grading scale A-F).

Ethical approach

- All members of a group are responsible for the group's work.
- In any assessment, every student shall honestly disclose any help received and sources used.
- In an oral assessment, every student shall be able to present and answer questions about the entire assignment and solution.
