

# BB1160 Eucaryotic Cell Biology

## 7.5 credits

### Eukaryot cellbiologi

This is a translation of the Swedish, legally binding, course syllabus.

If the course is discontinued, students may request to be examined during the following two academic years

### Establishment

Course syllabus for BB1160 valid from Autumn 2022

### Grading scale

A, B, C, D, E, FX, F

### Education cycle

First cycle

### Main field of study

Technology

### Specific prerequisites

### Language of instruction

The language of instruction is specified in the course offering information in the course catalogue.

# Intended learning outcomes

After completion of the course the student shall have

Knowledge and understanding to:

- Describe and explain functions in eukaryotic cells on a molecular level. (TEN1)

## Course contents

Through lectures and exercises, the course will describe organization and transport in eukaryotic cells and how single cells build up multi-cellular organisms. Moreover, principles for cell communication, will be described. The cell cycle, cell renewal and cell death including errors leading to cancer will be addressed from a molecular perspective. Central principles of the immune system is also part of the course.

## Examination

- TEN2 - Written exam, 7.5 credits, grading scale: A, B, C, D, E, FX, F

Based on recommendation from KTH's coordinator for disabilities, the examiner will decide how to adapt an examination for students with documented disability.

The examiner may apply another examination format when re-examining individual students.

## Ethical approach

- All members of a group are responsible for the group's work.
- In any assessment, every student shall honestly disclose any help received and sources used.
- In an oral assessment, every student shall be able to present and answer questions about the entire assignment and solution.
