P, F

Education cycle

First cycle

Main field of study

Technology and Health

Specific prerequisites

120 credits in technical science, natural science, medical science (incl. Audiologist, Physiotherapist) or human resources science. Alternatively, at least 2 years of professional experience in

work
environment development. English B/6

Language of instruction

The language of instruction is specified in the course offering information in the course catalogue.

Intended learning outcomes

The overall aim of the course is to give the student theoretical and practical knowledge on how general work environment development should be pursued, how work accidents can be prevented, how ergonomics and organizational factors can be assessed and developed. After completing the course, the student should be able to:

1. Understand and describe methods and processes used in sustainable work environment work.
2. Explain how risks of occupational accidents can be identified and prevented.
3. Describe what ergonomic risks are and how they can be identified and prevented.
4. Describe the organizational and social work environment, as well as how risks can be identified and prevented.
5. Describe the concept of Man-Technology-Organization.

Course contents

1. Difficulties and solutions within systematic work environment development
2. Models – production systems and man-technology-organization
3. Risk management - occupational accidents
4. Work and health, including ergonomics
5. Project work – work environment for a profession
6. Home exam

The course is largely conducted as distance learning with recorded video lectures and video lessons (Zoom)

with demonstrations of instruments and seminars with discussion of video and written material studied

before the seminars. An individual project work where the student carries out an investigation into the work environment within a particular profession.

Examination

- PRO1 - Project work, 1.0 credits, grading scale: P, F
- SEM1 - Seminars, 1.0 credits, grading scale: P, F

- TEN1 - Written exam, 1.5 credits, grading scale: P, F

Based on recommendation from KTH's coordinator for disabilities, the examiner will decide how to adapt an examination for students with documented disability.

The examiner may apply another examination format when re-examining individual students.

Ethical approach

- All members of a group are responsible for the group's work.
- In any assessment, every student shall honestly disclose any help received and sources used.
- In an oral assessment, every student shall be able to present and answer questions about the entire assignment and solution.
