

DH1620 Human-Computer Interaction, Introductory Course

6.0 credits

Människa-datorinteraktion, inledande kurs

This is a translation of the Swedish, legally binding, course syllabus.

Establishment

Course syllabus for DH1620 valid from Autumn 2012

Grading scale

A, B, C, D, E, FX, F

Education cycle

First cycle

Main field of study

Technology

Specific prerequisites

Language of instruction

The language of instruction is specified in the course offering information in the course catalogue.

Intended learning outcomes

After you have taken the introductory HCI course you are expected to be able to:

- identify basic concepts within HCI
- in a given data material identify theories and methods within HCI
- in a given situation apply theories and methods within HCI
- relate theories and methods within HCI to other principles of systems development
- in a given situation identify and analyze possibilities of applying theories and methods
- make motivated reflections of relevant theories and methods
- relate theories and methods within HCI to economical factors
- relate theories and methods within HCI to organizational factors
- make well motivated reflections of HCI in order to market HCI in a diplomatic way.

Course contents

The course presents theoretical and practical presentation of human aspects of the use and development of interactive computer systems and how usability design can aid the user to perform hers/his tasks fluently. Overview of methods and theories of behavioural science and how they relate to design and use of interactive computer systems. Focus will be on different forms of established practice within the field of HCI.

Examination

- PRO1 - Project, 3.0 credits, grading scale: P, F
- UPP1 - Tasks, 3.0 credits, grading scale: A, B, C, D, E, FX, F

Based on recommendation from KTH's coordinator for disabilities, the examiner will decide how to adapt an examination for students with documented disability.

The examiner may apply another examination format when re-examining individual students.

If the course is discontinued, students may request to be examined during the following two academic years.

In this course all the regulations of the code of honor at the School of Computer science and Communication apply, see: http://www.kth.se/csc/student/heder-skodex/1.17237?l=en_UK.

Ethical approach

- All members of a group are responsible for the group's work.
- In any assessment, every student shall honestly disclose any help received and sources used.
- In an oral assessment, every student shall be able to present and answer questions about the entire assignment and solution.
